This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

MINUTES.

STATE OF NEW JERSEY,
HOUSE OF ASSEMBLY,
TRENTON, N. J., TUESDAY, January 11th, 1910.

House met at 12 o'clock (noon).

This being the day designated for the assembling of the One Hundred and Thirty-fourth Legislature of the State of New Jersey, the House was duly called to order at 12 o'clock (noon) by James Parker, of Passaic county, Clerk of the last House, who presided pending the organization of the House.

Prayer was offered by the Rev. Henry Ward, D.D., of Closter, N. J.

Upon the calling of the roll, the following gentlemen appeared and answered to their names:

Messrs. Agnew, Auf der Heide, Baker, Bedle, Birch, Booraem, Bowden, Brooks, Burt, Christie, Cole, Crosby, Davidson, De Unger, Edge, Ford, Gillen, Goldingay, Hand, Heritage. Housel, Huegel, James, Kackenmester, Kissam, Layden, Lee, Mather, Matthews, McAllister, McCran, Meyer, Miller, Minard, Moore, Nichols, Olwell, Pierce, Pikaart, Pine, Poole, Radcliffe, Ramsay, Ridgway, Scharff, Schwartz, Smalley, Smith, Sullivan, Tatem, Terhune, Thompson, Tumulty, Vredenburgh, Walsh, Ward, White B. H., Whyte G. W., Wohlfarth—59.

Absent—Mr. Kenny—1.

The following gentlemen then presented their certificates of election:

Atlantic county—Walter E. Edge.

Bergen county—Joseph H. Scharff, Harry P. Ward.

Burlington county—Warren C. Pine, Blanchard H. White.

Camden county—Henry R. Tatem, Albert De Unger, George W. Whyte.

Cape May county—Christopher S. Hand.

The oath of office was administered by Mr. Agnew to Mr. Pierce, who administered it to the other members-elect; all members-elect then signed the roll.

Mr. Edge offered the following resolution:

Resolved, That the Honorable Edward T. Moore, of Passaic county, who is a Master in Chancery of this State and a member-elect of this House, administer the oath of office to the Speaker and other officers, when elected.

Which, on motion, was adopted.

The same gentleman offered the following resolution:

Resolved, That the House do now proceed with the election of Speaker.

Which, on motion, was adopted.

Mr. Scharff nominated the Hon. Harry P. Ward, of Bergen county.

The nomination of Hon. Harry P. Ward was seconded by Mr. Duane E. Minard, of Essex county.

Mr. Sullivan nominated the Hon. Joseph C. Tumulty, of Hudson county.

Upon the calling of the roll Mr. Ward was elected by the following vote:

For Mr. Ward:

Messrs. Bedle, Birch, Bowden, Brooks, Crosby, De Unger, Edge, Gillen, Goldingay, Hand, Heritage, Housel, Huegel, Kissam, Layden, Lee, Mather, McAllister, McCran, Miller, Minard, Moore, Nichols, Pierce, Pikaart, Pine, Poole, Radcliffe, Ridgway, Scharff, Schwartz, Smalley, Smith, Tatem, Terhune, Thompson, Vredenburgh, Ward, White B. H., Whyte G. W., Wohlfarth—41.

For Mr. Tumulty:

Messrs. Agnew, Auf der Heide, Baker, Booraem, Burt, Christie, Cole, Davidson, Ford, James, Kackenmester, Matthews, Meyer, Olwell, Ramsay, Sullivan, Tumulty, Walsh—18.

Mr. Ward having received a majority of the votes was declared by the Clerk elected Speaker of the House for the session of 1910.

The Clerk requested the Hon. Joseph P. Tumulty, of Hudson county, the Hon. Carlton B. Pierce, of Union county, and the

The period of the session should be so limited as to preve political campaigns being conducted on the floor of the Hou and the required constant consideration of necessary and ben ficial measures should render time too valuable to allow a mono oly of the floor by any legislative paranoiac who believes that l is destined to revolutionize the whole social system of o government.

I earnestly request the various committees to get to work ear in the session.

Every bill should be carefully considered.

The subject-matter of every bill should be considered wi relation to existing laws.

Bills of little or no merit or bad as to form should not be p mitted to be considered on the floor of the House.

If the introducer is not sufficiently interested in the merits his bill to see that it is properly prepared, unless it contains sc principle the enactment of which into law is important to people of our State, and which in the opinion of the commi demands its introduction in substitute form, it is not to be pected that it should receive other than scant committee sideration.

I conceive it to be the duty of the committees not alon advance and urge the adoption of beneficial legislation, but to safeguard the interests of our State by avoiding the pas of ridiculous, ineffective or unnecessary laws.

The passage of many seemingly harmless or even merito measures has often nullified, or so modified as to render in tive, important existing statutes.

To the end that my administration as Speaker may successful I earnestly request the united co-operation of the bers of the House.

The Speaker announced the appointment of Mr. Calel Husan Whitbeck, of Bergen county, as his private secretar Mr. William M. Pietz, of Bergen county, as his assistant secretary.

Mr. Edge offered the following resolution:

Resolved, That we now proceed to the election of the the House.

Which, on motion, was adopted.

Mr. Moore nominated the Hon. James Parker, of county.

Honorable James Parker, of Passaic county, as Clerk, and is now ready to proceed to business and to receive any communication he may be pleased to make.

Which, on motion, was adopted.

The Chair appointed the following committee:

Messrs. Smalley, Pierce and Tumulty.

Mr. Edge offered the following resolution:

Resolved, That the Clerk of the House be and he is hereby directed to inform the Senate that the House of Assembly has organized by the election of the Honorable Harry P. Ward, of Bergen county, as Speaker, and the Hon. James Parker, of Passaic county, as Clerk, and has proceeded to business.

Which, on motion, was adopted.

The same gentleman offered the following resolution:

Resolved, That the House now proceed to fill the several positions, and that nominations be made and a vote taken for all of the positions at one and the same time.

Which, on motion, was adopted.

The same gentleman offered the following resolution:

Resolved, That the following named persons be and they are hereby elected to the several positions set opposite their respective names:

assed, and industrial pursuits and agricultural employments are gain active. We should give thanks to the God of our Fathers nd our God for His beneficent Providence toward us, and for he civil and religious liberty which we enjoy in the Republic of which we are a part.

FINANCIAL CONDITION.

At the last session of the Legislature the financial condition of the State gave much concern, but the legislation enacted and the economies practised at that session have proven beneficial, and the reports of the financial officers of the State for the fiscal year ending October thirty-first, one thousand nine hundred and nine, show a satisfactory balance on the credit side.

The free balance on the thirty-first of October last was nine hundred and sixty-four thousand three hundred and fifty-three dollars and fifty-one cents. The revenues coming into the treasury of our State are largely received at fixed periods, and, in the interim between these periods, it is necessary that the treasury should be in condition to meet all demands.

The fact that there was a free balance in the treasury at the end of the last fiscal year should not be held to justify the Legislature at this session in indulging in large expenditure in any direction. There is quite as clear a duty upon the present Legislature to maintain economy in the administration of public affairs as there was upon the last.

Reasonable appropriations for the State institutions and for a few additional buildings should be made, but, aside from these, there is no demand for any extraordinary expenditure at this session.

The condition of the State Treasury on October thirty-first, last, may be summarized as follows:

STATE FUND.

Gross receipts during the fiscal year ending October 31st, 1909,	$8,637,221 57
Gross balance, October 31st, 1908,	2,818,276 47
Total in the treasury during the fiscal year,	$11,455,498 04

his add the Comptroller's itemized estimate to the probable receipts for State purposes nly, for the fiscal year ending October 31st, 910, as shown in his report, ...	$5,151,870 00
Making a total of actual and estimated resources for the year 1910 of, ...	$6,116,223 51

[To this estimate of resources there will be added, as part of he receipts, the amounts which may be received at the various stitutions for board of patients or labor on contract work and he like, but as the receipts from institutions only go into the reasury to be credited to the several institutions to be immeliately repaid out to them, it should not enter into the question estimated receipts, and cannot, of course, be stated with any accuracy.]

The disbursements to be made during the fiscal year ending October thirty-first, one thousand nine hundred and ten, are estimated by the Comptroller as follows:

To meet the appropriations made by the Legislature of one thousand nine hundred and nine for the fiscal year ending October thirty-first, one thousand nine hundred and ten, as shown in chapter two hundred and seventy-two, Laws one thousand nine hundred and nine, $4,245,017.32.

Summary of Estimated Receipts and Disbursements for Fiscal Year Ending October 31, 1910.

Total Estimate of Receipts, ...	$6,116,223 51
Total Estimate of Disbursements, ...	4,245,017 32
Leaving an Estimated Free Balance October 31, 1910, of	$1,871,206 19

Of course, from this free balance will have to be paid all the appropriations which the present Legislature shall make in the Supplemental Appropriation bill. If the supplemental appropria-bers of the Boards be hereafter appointed for terms of six s; the first appointment being for one, two, three, four, five six years, respectively, and thereafter to fill vacancies or for ull term of six years. This would limit the possible expenses the managers of each institution to fourteen hundred dollars, d would be the wisest possible expenditure of such a sum. is reduction of the Boards would insure a quorum at every eeting, which frequently is not now obtained, and would con-ntrate responsibility.

PENAL INSTITUTION SUGGESTIONS.

The act creating the Rahway Reformatory authorizes the transfer of a certain class of its inmates from the Reformatory to the State Prison. There are in the State Prison several young men confined for their first offense; some of them under seventeen years of age. They should not be there unless their offense be murder, and it is not clear that they should even be there for that.

I recommend the enactment of a law authorizing the Board of Inspectors, on the recommendation of the Keeper of the State Prison, with the approval of the Governor, to transfer from the State Prison to the Rahway Reformatory, such inmates of the State Prison as are first offenders, and who are under the age of twenty years, as they may deem it to be of advantage to the inmate to so transfer.

I also recommend that the law increasing the age of girls who may be sent to the State Home for Girls from seventeen to nineteen years, be repealed and the maximum age be again placed at seventeen. It is shown, by experience, that girls over seventeen years of age should not be sent to the Home. If a Woman's Reformatory be created they can be sent there. Girls under seventeen years of age in the State Prison (if any such there be), should also be transferred to the State Home for Girls in the same manner as here recommended as to transfer of boys to the Reformatory. An easy method of such transfer will be of great advantage to all these institutions.

At present the law permits the sending of persons to the State Prison for any period of not less than six months. This is wrong

RECOMMENDATIONS FOR INSTITUTIONS.

The following recommendations are made for the betterment of the several institutions of the State:

(1) A House of Detention for convict insane sho erected on the grounds of the State Hospital at Trenton. are now about two hundred of this class confined in tl State Hospitals, and the management of each, and their r directors, earnestly urge this action. My personal ins confirms their view. The present institutions are not cons for detaining this class, and their confinement with the insane is exceedingly detrimental.

Such an institution should be placed under the control Board of Managers and officers of the State Hospital at ton. No increase of expense would be required, save i construction of the building to house the inmates to be ferred from the two hospitals.

(2) A Woman's Reformatory should be erected on th erty of the State at Jamesburg, and placed under the m ment of the Board now controlling the Boys' Home.

The State Prison is overcrowded, and this will afford relief. There are forty-four women now confined in th Prison, and from thirty to forty in the Girls' Home, who be transferred to the Woman's Reformatory.

The Reformatory should be constructed for the deten one hundred and fifty, and in such a way that a wing c added for fifty more, in case of future needs. This woul ably answer for the next twenty-five years.

The Girls' Home management ask for an appropria thirty thousand dollars at this time to provide a disci building at the Home, if the older girls now there anc sent there are to remain.

The State Prison authorities ask for the erection of a s wing or a laundry with cell attachment for the care of of the women there.

The expense of each of these buildings will be avoide Woman's Reformatory be erected. Economy and wise

The Comptroller's office is doing the work, under its present difficulties, with commendable zeal and care; but it cannot continue it without additional assistance. With a department doing nothing else, the results would be surprising and of great advantage to the treasury. Two per centum of the total receipts would more than cover the expense of the department. The State, prior to this year, paid five per centum on all such collections to the Surrogates.

As to the Department of Corporations, the arguments for it, and the benefits to be derived from it, were fully stated in my Inaugural.

These matters are commended to the thoughtful consideration of the Legislature, as experience has convinced me that they are decidedly for the good of the State. The creation of these departments would not increase the cost of the work as now done, and would, I am sure, promote its efficiency along all lines and augment the revenue of the State.

PUBLIC UTILITIES COMMISSION.

In my Inaugural address and First Annual Message, the creation of a Public Utilities Commission, with ample powers to regulate public utility corporations, was recommended. This recommendation was in line with the pledges made to the people of the State by both political parties in their respective conventions in 1907.

The opposition to such legislation emanates solely from interested sources and corporations which control the franchises for public utility purposes. If the people of the State could fully realize the character of the influence exerted to defeat this beneficent legislation, or could be brought to fully appreciate the advantages which would accrue to them under it, the result would not be doubtful.

At the present time there is absolutely no control, in any authoritative way, over the public-serving corporations of this State. If they give good service, well; if poor, the people are without remedy. If they charge for gas or electric light, or for corporations, their officials, and lobbyists, are arrayed against the proposed legislation, and the use of their money, gotten from the people, is felt in the elections, if not in other directions, and, up to this time, it would seem to have been potential.

This question touches every householder and tenant in the State. It affects every home. It is a vital issue and will not down. The failure to enact this legislation during the past two years has been a flagrant violation of a most honorable and specific political pledge.

The Republican party in the State platform, on which the present Governor was elected, declared "we pledge ourselves to enact a law providing for a commission with ample jurisdiction and powers to enable it to regulate public utility corporations effectively and authoritatively." There is no ambiguity in this language.

The platform of the Democratic party was equally clear.

There is absolutely no excuse for not keeping this pledge, except that the corporations to be regulated oppose it. At the last session of the Legislature, their lobbyists were about the State House. In a most notorious and audacious manner they entered the Assembly Chamber and tried to defeat any public utilities bill. They opposed even the reasonable and fair act, known as the "Pierce Bill," then pending in the House of Assembly.

It is often stated that no one is coming to the Legislature demanding the passage of a public utilities bill. Why should they come? Did not the party, which now has a working majority in the Legislature, promise the people to enact such a law? When a platform promise is made, do we expect the people, after they have elected us upon it, to keep coming to the Executive and the Legislature and demanding that we keep it? Such a suggestion is a reflection upon our honesty, not only as representatives, but as men. No pretext can disguise it; no subterfuge evade it. There have been two years within which to fulfill this promise. We shall stand self-convicted of a breach of faith with the people if we fail to keep it in this the third year.

Whatever bill is enacted should provide for the consolidation

For the first time in its history, New Jersey will have an opportunity to send to the Senate the man for whom the people may declare their preference. In every sense, this is greatly to be desired.

The people are coming to take more interest in the primary than at any time hitherto. This is fortunate. The primary is the real source of all political power. In many cases a nomination is equivalent to an election, and it is vital to Republican government that the people control the primary elections.

For myself, I strongly favor strengthening the present primary laws and their extension to the nomination of member of Congress and the Governor.

THE BLANKET BALLOT.

Forty-two States in the Union use the form of ballot known as the "blanket ballot." That is a ballot upon which is found the names of all candidates. There are two classes of these ballots, namely, the Massachusetts ballot, which disregards all party columns, on the ticket; and the Wisconsin form, which recognizes party columns and permits the voting of a straight ticket by simply putting a cross in a circle at the head of the respective party columns under the party caption.

Parties exist in this country, and have always existed since our government took on a written constitutional form. It is doubtful if parties will ever cease to exist, and it is equally doubtful whether it is wise that they should. Parties are presumed to stand for certain principles, and if a voter who believes in the principles for which a party stands finds upon the ticket of that party the names of men for office, all of whom are in his estimation unobjectionable, I can see no reason for refusing to allow him the right to vote a "straight ticket" by simply placing a cross in a circle at the head of a party column on the ticket.

The essential thing is a form of ballot upon which shall be found all the candidates of all the parties, so that each voter may have before him every candidate for office on a single piece of paper. These ballots should be furnished and distributed to the parties engage in the improper; not to say the illegal, use of money at elections, and grand jurors will not indict. Prison penalties are apparently of no avail to check this class of crime.

By paragraph two of Article II of our State Constitution, it is provided: "The Legislature may pass laws to deprive persons of the right of suffrage who shall be convicted of bribery." I believe, if the present laws for the imprisonment of persons convicted of bribery at elections were repealed, and upon a conviction for bribery the court should adjudge and determine that the defendant be deprived of the right of suffrage, it would do more to put an end to election corruption than any other kind of punishment possible. It would appeal to the popular sense as a just form of penalty, and the law would be enforced.

ELECTION OFFICERS.

There is much complaint from certain sections of the State about the election officers. It relates to their efficiency and impartiality, and in some localities to their partisan zeal.

In selecting election officers the greatest care should be taken. They should possess certain qualifications as prerequisite to their appointment, among others, these:

1. They should be physically healthy.
2. They should understand the simple rules of division and addition.
3. They should be able to write fairly rapidly and well.
4. They should be good readers.
5. Their eyesight should be good.
6. Their moral standing and personal character should be unquestioned.
7. They should possess a fair knowledge of the election laws.

They should also have a fixed tenure, for say five years, or what would be still better, they should hold office during good behavior.

No person should be appointed as an election officer until he has passed an examination in at least the respects above indicated, and opportunity should be given to any person to go into the

) voted at the last election, before the presentation of the tion for the placing of the machine.

'robably nothing has ever before been quite so unpopular with voters of our State as the voting machine. The paper ballot nits of care and deliberation in voting, and a free and inde- dent exercise of the right of suffrage. A citizen has the right :now and be sure, not only that he has voted, but how he voted. With the machine he can not possibly know either.

LICENSE AND EXCISE.

)ne of the vital questions in the State is that of a more strin- t regulation of the liquor traffic. Prohibition is not practical. oes not prohibit and will not until a stronger and better public iment shall obtain.

'he sentiment for local option in the election just passed wed much growth in some communities. That sentiment, ever, is probably not of sufficient force to secure legislation a submission of the question of license, or no license, to the ple. Yet, it is evident that the public demand for the enforce- it of existing laws, and for the enactment of others looking better regulation of the sale of intoxicating liquors, is quite versal.

The license fees in most places in this State are not high ugh. To me it is inexplicable that those in political life uld fear the saloon and its influence, and thus fail to enact requisite high license legislation. Of course, I realize, and know, that the saloon is in politics and that large sums of ney are spent by the saloon interests at each election. That re is no cause for fear from this influence was made manifest he Gubernatorial election in one thousand nine hundred and en and the Senatorial election in Passaic county in one thou- d nine hundred and nine.

The people of this State are right on all moral questions, and man who stands for the right in this matter need not fear political consequences.

local conditions, and other parts permit them to do so without producing State-wide disrespect for law.

In one of the counties of this State the laws as to excise matters are openly and notoriously violated, and a direct refusal to enforce them asserted. Grand juries ignore their oaths; sheriffs, police magistrates, and other officials fail to arrest, and a flagrant violation of, and even open hostility to, the laws of the State exist there on every hand. This has continued so long that one class of violators threaten another, and each allows the other to escape, fearing mutual recrimination.

That such conditions exist is shocking to the conscience and patriotism of all right-thinking citizens. Yet, under existing law, there is, apparently, no remedy. The State seems powerless. Local officials are free from removal by the Governor or courts, even for an open declaration that they will not enforce the law. When the Attorney-General gave notice, under chapter one hundred and seventy-three of the laws of one thousand nine hundred and one, to enforce the law the local officials still refused and spurned the State and its laws and relied upon the grand jury to refuse to indict. Nor is there any power of impeachment of a local municipal official.

Is this condition to continue in our State? It is a reflection upon our civilization that such nullification of law can exist and the State be powerless to act.

For what is all this permitted? Simply for the filthy gain that comes from the open violation of the law. The sacredness of the Sabbath, the purity of the ballot, the virtue of woman, the protection of life itself, all seem inconsequential when weighed in the scale against the illicit sale of liquors.

The situation here depicted is not in the least over-stated. It is constantly before the Executive. It is humiliating to have a local official defy every law he may please to consider objectionable, and the State be unable to punish or compel enforcement.

A community that openly and intentionally violates the law, against the demands of the Governor, the instructions of the Courts, the notice of the Attorney-General, and the moral sense of the people of the State, is in a condition of antagonism that is anarchistic in form and effect.

part of every contract of employment in any public or quasi-public, industrial or private business in this State.

INLAND WATERWAY.

The Inland Waterway Department was created by chapter fifteen of the Laws of one thousand nine hundred and eight. By that act, three hundred thousand dollars were appropriated. This sum was to be available from time to time, as provided by the annual appropriation bill. Up to the present time, the Legislature has granted one hundred and twenty-five thousand dollars.

The route of the proposed inland waterway has been approved by the Governor, under the statute, and when completed, as contemplated, will furnish a channel six feet deep at low water from Bay Head, in Ocean County, to Cape May City, in Cape May County.

Work has been done, under contract, which has opened the channel from Bay Head to Cedar Bonnets, by removing the reef, or flat, at the mouth of Metedeconk creek, near Bay Head. At the Cape May end, work has progressed from Cape May City to Rio Grande Bridge, and a section is now being dredged from Rio Grande Bridge to Grassy Sound channel. When the section between the Rio Grande Bridge and Grassy Sound channel is completed there will be an open waterway from Cape May harbor to Great Sound, which will afford access between Cape May and Wildwood, Holly Beach, Anglesea, Stone Harbor and other towns.

Another section is also being dredged through Grassy Bay. When this last section is completed and a short flat section is dredged at Cedar Bonnets (which is abreast of Harvey Cedars), a route will be opened which will provide a channel of one hundred feet in width and of not less than four feet in depth at low tide from Bay Head to Atlantic City.

The most extensive work yet remaining to be done is between Great Sound, in Cape May county, and Atlantic City.

It is quite apparent that the work contemplated, under the original survey and the route as approved, can be completed within railway property might be reduced. They have accomplished this purpose with a resultant loss to the public school funds for distribution by the State of not less than five hundred thousand dollars per year for each year since their creation.

One of the excuses given for the enormous increase in property values in the State has been the maximum tax rate act of 1906, which, it is claimed, has required the increase of assessable values in order that under it municipalities might get enough revenue to run their local governments. There may be some truth in this. But it only demonstrates the cunning which devised County Boards of Taxation and maximum tax rate laws to furnish a method for lowering the average tax rate, which, by the act of one thousand nine hundred and six, was made the basis for the taxation of railroad property.

I recommend the repeal of both the act creating County Boards of Taxation and the maximum tax rate act of 1906.

If the County Boards of Taxation are not abolished, then the Legislature should place the expense of their maintenance upon the counties. Why should the State pay the salaries of these boards? They are in no sense State officers. The State derives no revenue from any act which they perform. Yet we pay out over ninety thousand dollars per year which would be saved to the State Treasury by abolishing them, or by transferring their cost to the counties. If they are of advantage to the counties, let the counties bear the expense.

THE LAND ADJOINING THE CAPITOL.

The State should acquire a strip of land along the street which lies on the east of the Capitol building. The land owned by the Green estate fronting on State Street about eighty feet, and running back to Front Street, can be purchased. The price asked for it is thirty-five thousand dollars. The State now holds an option upon it at this price.

When the land is acquired, Delaware Street, which adjoins the Capitol on the east, should be closed, and the whole tract put into the Capitol grounds. In order to close this street, a few nance would not increase the present expense of maintaining the Capitol, as the new building could be heated from the present plant, and there is a force now employed sufficient, in my opinion, to do all the necessary care-taking about the new building.

A GOVERNOR'S RESIDENCE.

The Legislature at its last session, by paragraph 3 of Item No. 12 of the general appropriation bill, authorized the State House Commission to rent a house in the city of Trenton for the occupancy of the Governor, and appropriated twenty-five hundred dollars for that purpose. Of course, I appreciated the action of the Legislature, but I did not feel that I should avail myself of it, and, hence, no house has been rented, and the appropriation has lapsed into the treasury. My reason for this action is that I had urged that a residence be procured for the *next* Governor in Trenton, and, having so done, I did not feel at liberty to accept one for myself. My thanks are due to the Legislature for its courteous and friendly action, but whatever is done in this line must apply to the next Governor and not the *present* Governor.

That the Governor of New Jersey should be provided with a house in Trenton, my experience has clearly demonstrated. The duties of the Chief Executive of this State are multitudinous and require practically all his time. If he is faithful to the trust, he cannot do other work to any extent, and in my view he should not do it. He should reside at the capital during his term.

All the reasons urged in my special message at the last session are here reaffirmed. If the State is not ready to purchase or build a suitable residence the present year, provision should be made to rent and, if necessary, furnish a suitable house in the city of Trenton for the occupancy of the Governor. Authority should be given to the State House Commission for this purpose.

TAXED COSTS IN LITIGATION.

For many years the bar and people of the State, as well as the clerks of the courts, have objected to the present method of taxing costs in causes pending in the courts.

land and Ireland will lead one to see the great advantage to be derived from them. The practical part of the work must be done in the factory, and the way it should be done demonstrated by skilled men at other than factory hours. The manufacturer will aid any movement to promote the skill of the men in his factory, and the man in his employ will surely be glad to embrace any opportunity to improve his handiwork, which, of necessity, will increase his earning capacity.

The boy in the free school, who is usually under fourteen, hardly knows what he is to take up as a life work. When he does enter upon that work he will embrace any aid the State may give him to make himself more efficient.

Trade or industrial schools, in my view, to be effective, will need to be conducted largely at night, and must of necessity be somewhat specialized. Knowledge of conditions in standard trades such as the machinist, carpenter and the like, that are common to all places, of course, can be taught in all schools, but special subjects, such as pottery in Trenton, silk in Paterson, jewelry in Newark, and the like, need to be taught only in places where the special industry exists.

The whole question is considered with much ability in the Commission's report, and aid should be given by the State in such ways as will result in an effective trade school being established in each locality where it will be useful.

In the fierce contest for industrial supremacy among the nations of to-day we need to give especial care to the training of our operatives in all lines of business activity.

OUR AGRICULTURAL INTERESTS.

New Jersey is deeply interested in Agriculture and Horticulture. We are greatly increasing the value of our farm lands and the annual crops.

It is quite doubtful if it be generally known what progress has been made in the annual value of the farm products of our State. In 1900 the value of the field crops and milk in our State was but twenty-four million dollars, while in 1909 they exceeded ern lines. How can he get this? The agricultural training at Rutgers College is doing much for our young men. But all cannot have the advantage of this training. Observation is the best lesson in anything. If we had a State farm, conducted on the most approved modern lines, and raising the profitable crops; that could be visited and its methods studied for practical instruction, good results would follow. Skilled farmers estimate that a farm of this kind of moderate size would produce a revenue that would yield a profit to the State of several thousand dollars per year over its cost, besides being of incalculable value, by way of instruction, to the farmers of the State.

The horticultural exhibit lately seen in the Assembly Chamber was gratifying in every sense to State pride. Everything that can be done should be done as an aid to instruction, and in the adoption of advanced and improved methods in agriculture and horticulture.

New Jersey is so situated that any kind of farming, truck gardening or fruit growing is undoubtedly profitable and must steadily increase in value.

Reasonable appropriations to aid agricultural developments should be made.

WATERS OF THE STATE.

By chapter two hundred and thirty-eight of the Laws of one thousand nine hundred and five it was made unlawful for any person or corporation to transport or carry through pipes, conduits, ditches or canals the waters of any fresh water lake, pond, brook, creek, river or stream in this State into any other State for use therein, and power was given by proceedings in the Court of Chancery to enjoin any such attempted action.

The Hudson County Water Company, a corporation created by our laws, notwithstanding this statute, attempted to lay pipes for the purpose of transporting the waters mentioned in the statute from this State to the borough of Richmond in the State of New York.

At the relation of the Attorney-General a decree of the Court of Chancery was made restraining said company, and the same make it imperative that all water rights, whether surface or subterranean, should be preserved and controlled by the State for our own use.

No subject is of greater moment to our people than the conservation of our potable waters. No individual or corporation should be permitted to transport out of the State any water within our territory; certainly not without the permission of the Water Supply Commission or some other State board.

We should not permit the sale of this necessity of life in any case where it could in any way interfere with the full and free water supply required for our own people. No individual or corporation should be allowed to make gain at our expense, and the Legislature will have no matter before it more important than the enactment of stringent laws upon this subject.

I not only recommend that the act of 1905 be extended to subterranean waters, or a new act passed, covering such waters, but I suggest that a statute be enacted making it a misdemeanor for any individual or corporation to attempt to divert any of the potable waters of the State, for any purpose, to any point out of the State.

I further recommend that a statute be passed empowering the Court of Chancery to enjoin for any entry upon the lands of the State where such lands are under the jurisdiction of the Riparian Commission as provided in Sections 25 and 38 of the Riparian Act.

TUBERCULOSIS.

By Joint Resolution No. 4 of the Laws of 1909, the Legislature created a commission and appropriated fifteen hundred dollars to promote the work of education in fighting tuberculosis.

A great meeting was held in Trenton and the State has been awakened to the importance of this work. Several counties have established local sanatoriums and private enterprise has supplemented them.

The State has the Glen Gardner institution which accommodates about one hundred and twenty-five patients.

The scourge of tuberculosis gives us our greatest death rate—that of last year reaching almost four thousand. It is the enemy

The First Battalion, Naval Reserve, has the U. S. S. "Portsmouth" as its training ship. This is a sailing vessel of the old type, and is not a satisfactory ship for the battalion. Provision should be made at the present session of the Legislature for a sufficient appropriation to assure the securing of a proper steam-power vessel for the battalion, and application should be made to the Secretary of the Navy to assign a suitable ship of this class for the use of this battalion.

At the Hendrick Hudson celebration, the State had reason to be proud of the representation of its National Guard, in the Fourth New Jersey, which participated in the land parade upon that occasion; and also of the part taken by the first battalion of the Naval Reserve on the U. S. S. "Portsmouth" in the naval part of the celebration.

If the entire militia of the State could have been present, New Jersey's contribution to that historic celebration would have demonstrated the efficiency and soldierly qualities of our entire National Guard.

STATE HIGHWAYS.

In my last annual message I outlined a plan for a system of State highways in connection with the ocean boulevard, and the Legislature took steps looking to a compliance with the suggestion then made, by the enactment of chapter thirty-three of the laws of one thousand nine hundred and nine. That act appointed a Highway Commission, consisting of the Governor, the President of the Senate, the Speaker of the House and the Commissioner of Public Roads.

During the past year this commission has held several meetings, and at least one public hearing, which hearing partook largely of the nature of a conference with the boards of freeholders and other officers in the counties lying along the Atlantic Ocean.

The Highway Commission has made a report, which will be presented to you, and they recommend the creation of a system of highways to be maintained at State expense, and to run from county seat to county seat and connect with an ocean boulevard

The great burden upon the counties in the matter of public roads is the maintenance problem, and if the counties can be relieved of the annual maintenance of eight hundred and fifty miles of highways, it will mean much in the matter of the reduction of local taxation.

In addition to this eight hundred and fifty miles of highway, the State should take over and maintain that which was the old turnpike road between Jersey City and Newark. This road is traveled by people from all parts of our State, and by all persons coming from New York into our State, and the cost of maintaining it should be borne by the State at large. A good highway between Jersey City and Newark is needed and would be of great advantage to the State.

All these are commended to the good judgment and public spirit of the Legislature, with the earnest hope that the plan here suggested may be carried out.

RAILROAD REVALUATION.

By Joint Resolution No. 3 the Legislature at its last session authorized the appointment of a commission to revalue the railroad property of the State.

This commission was selected with great care, and the most capable and efficient men for the duty that could be obtained were named by the Executive. They have presented a preliminary report which will be before the Legislature.

The work was found to be very exacting and to require great care and large expense. The appropriation made at the last session for this purpose was twenty thousand dollars, which has been expended and the work carried on to the extent of the appropriation. It would be neither proper nor in the interest of the work to give details of the result so far accomplished further than that which the preliminary report conveys.

For many years there has been much criticism of the valuation of railroad property, and allegations that it has not been fairly and fully valued. This may or may not be just, but whether just or otherwise, the matter should be put at rest and a final deter-

INSURANCE OF STATE PROPERTY.

An inquiry into the insurance carried upon the various properties belonging to the State shows that the total amount, including that on the Capitol, is three million eight hundred and ninety-two thousand seven hundred and twenty-five dollars. This is a very large and, to my mind, a very excessive amount of insurance. The State seldom has a loss by fire, and when a fire does occur the damage is usually not great. The present method of each institution placing its own insurance is not a wise one. The insurance on the property of the State should be under general supervision, and should be placed after most careful consideration and at the lowest possible rates. Besides that, the time, in my judgment, has come when the State should begin to prepare to assume the insurance risk on its own property by raising a fund for that purpose. If the average amount of the premiums paid per annum for the next ten years were transferred to an insurance fund, we would have an abundance to make it reasonably safe to cease to insure the State's property. In addition to this, there should be a proper supervision of the buildings in the State, that they may be properly equipped for necessary fire protection, so that the limit of possible loss may be reached. Of course, on State property there is no moral risk for the insurance company, as there can be no motive of personal gain to anyone to cause the destruction of any property of the State.

The rate which we are paying at the present time for insurance is too high. I suggest that the whole matter of the insurance of the property of the State be placed in the State House Commission, and that they be given power to engage a proper person to see that the buildings of the State are properly protected against fire, and that such person shall also keep the records as to the insurance upon and the necessity for renewal of insurance on the several buildings of the State.

The insurance policies should be in the State House, the books kept there, and perfect familiarity should be maintained by the Governor and the financial officers of the State with the whole matter.

of land and one million dollars in cash by Mrs. Harriman, widow of the late E. H. Harriman, and a number of large subscriptions by public-spirited citizens of New York State. The fund raised by these gifts exceeds two and one-half millions of dollars, and the State of New York is expected to authorize an expenditure of a like amount. The Governor of that State has so recommended in his message to the present session of the Legislature. This fund is to be expended to open the Hendrick Hudson Drive along the whole distance of the Palisades Park on the Hudson river, thirteen miles of which, as we have seen, lies in New Jersey. Our State will be asked to make a reasonable appropriation, payable at easy intervals, and the Legislature should respond by generous action in this matter.

GRAND ARMY OF THE REPUBLIC.

The National Encampment of the Grand Army of the Republic held at Salt Lake City the past year voted that the next annual encampment should be held at Atlantic City, in this State. This will be the first time that the National Encampment of the Grand Army of the Republic has ever been held in our State. The last session of the Legislature authorized an expenditure of twenty-five thousand dollars to aid in the expense of the encampment of the veterans, if they should come to Atlantic City. They have now decided to come, and the obligation is upon us to fulfill our promise in the supplemental appropriation bill. The people of the State and all of their officials should lend to this occasion every support possible. We should endeavor to make it one of the greatest occasions that has ever occurred within our borders. The veterans of the Grand Army are getting old, and it will [illegible] be a few years before their days for holding encampments will have ended. What the public owes to them can never be paid. It is fitting, therefore, that general attention should be directed to this meeting, and that the State should aid in every way to assist the New Jersey department of the Grand Army in making a success of this encampment.

New Jersey Volunteers. At the close of hostilities he settled in Camden county and became one of its most eminent citizens, occupying many positions of trust before being elected to the Legislature in the evening of his life. In 1882 he was elected high sheriff of Camden county, filling that position, as he did all others, with credit to himself and his party. For the past seven years Mr. Gibbs served Camden county in the House of Assembly, and he would undoubtedly have been re-nominated and re-elected last fall had his health not failed. The sturdy and rugged honesty of Mr. Gibbs, coupled with his common-sense views on all matters, and his sterling integrity endeared him to his friends and commanded the admiration and respect of those who differed from him. All in all, Theodore B. Gibbs was a true type of patriotic American manhood, and in saying that no better tribute can be paid to his memory.

Which, on motion, was adopted.

Mr. McAllister presented the following communication, which was read by the Clerk:

To the Speaker and Members of the General Assembly:

It is with regret that I call the attention of the House of Assembly to the decease of the Hon. Robert More, which occurred on January 2d, 1910.

Mr. More was a Republican and prominent at the birth of the party in Cumberland county. He was the first Republican member to serve his State from that county, serving as a member of the House during the years 1856, 1857, and again during the years 1866, '67 and '68. In 1867 Mr. More introduced the resolution providing for the portrait of Lincoln by the side of Washington, and it now hangs on the wall before this House. As chairman of the committee to secure the portrait, he made the speech at the time the portrait was placed where it now is.

Mr. More has been termed "The Grand Old Man of Cumberland County." Always interested in the affairs of State, honest, sincere, true to his friends and his party, his ninety years of life made the world better for his living.

The same gentleman offered the following resolution:

WHEREAS, The death of the Honorable Robert More on January 2d, 1910, marked the passing of one of the men prominent in Cumberland county and a former member of this House; now, therefore, be it

Resolved, That the following memorial be spread on the minutes of the House of Assembly:

tion; *provided, however,* that on a written request of fifteen members of the House handed to the chairman of a committee, said committee shall, within two hours, report on the bill, resolution, motion or matter named in said request."

After an argument pro and con, Mr. Tatem moved the previous question.

The Speaker put the previous question, "Shall the main question now be put?"

Upon a viva voce vote being taken, the Speaker declared it carried.

The substitute resolution offered by Mr. Sullivan was then taken up and lost by the following vote:

In the affirmative were—

Messrs. Agnew, Auf der Heide, Baker, Booraem, Burt, Christie, Cole, Davidson, Ford, James, Kackenmester, Matthews, Meyer, Olwell, Ramsay, Sullivan, Tumulty, Walsh—18.

In the negative were—

Messrs. Bedle, Birch, Bowden, Brooks, Crosby, De Unger, Edge, Gillen, Goldingay, Hand, Heritage, Housel, Huegel, Kissam, Layden, Lee, Mather, McAllister, McCran, Miller, Minard, Moore, Pierce, Pikaart, Pine, Poole, Radcliffe, Ridgway, Scharff, Schwartz, Smalley, Smith, Tatem, Terhune, Thompson, Vredenburgh, Ward (Speaker), White B. H., Whyte G. W., Wohlfarth—40.

Mr. Sullivan offered the following as a substitute resolution for Mr. Edge's resolution, and moved its adoption:

Resolved, That the rules for 1909 be adopted as the rules of this House for the session of 1910.

Which, upon the ayes and nays being called, was lost by the following vote:

In the affirmative were—

Messrs. Agnew, Auf der Heide, Baker, Booraem, Burt, Christie, Cole, Davidson, Ford, James, Kackenmester, Matthews, Meyer, Olwell, Ramsay, Sullivan, Tumulty, Walsh—18.

In the negative were—

Messrs. H., Whyte G. W., Wohlfarth—40.

The original resolution offered by Mr. Edge was then taken up and passed by the following vote:

In the affirmative were—

Messrs. Bedle, Birch, Bowden, Brooks, Crosby, De Unger, Edge, Gillen, Goldingay, Hand, Heritage, Housel, Huegel, Kissam, Layden, Lee, Mather, McAllister, McCran, Miller Minard, Moore, Pierce, Pikaart, Pine, Poole, Radcliffe, Ridgway, Scharff, Schwartz, Smalley, Smith, Tatem, Terhune, Thompson, Vredenburgh, Ward (Speaker), White B. In the negative were—

Messrs. Agnew, Auf der Heide, Baker, Booraem, Burt, Christie, Cole, Davidson, Ford, James, Kackenmester, Matthews, Meyer, Olwell, Ramsay, Sullivan, Tumulty, Walsh—18.

Mr. Edge offered the following resolution:

Resolved, That a committee of three be appointed by the Speaker to furnish bill files and minute files for the use of members and officers of this House.

Which, on motion, was adopted.

The Chair appointed Messrs. Schwartz, Bedle and De Unger as such committee.

The same gentleman offered the following resolution:

Resolved, That a committee of three be appointed by the Speaker to procure the attendance of clergymen to open the sessions of this House with prayer.

Which, on motion, was adopted.

The Chair appointed Messrs. Mather, Vredenburgh and Smith as such committee.

The same gentleman offered the following resolution:

Resolved, That the Clerk of this House be and he is hereby directed to furnish 150 copies of the Members' Pocket Calendars, Legislature, 1910, the same not to exceed in cost one dollar per copy.

Which, on motion, was adopted.

The same gentleman offered the following resolution:

(5) Under the by-laws of this corporation, patients who are able to pay are charged a nominal entrance fee and weekly board, but such cases are extremely rare and the majority of persons applying to this institution are wholly indigent and without means. This institution was opened on the fifteenth day of November, 1909, and since that time it has been receiving and caring for patients from all parts of what is known as South Jersey, extending even as far north as Trenton, the other large cities being Atlantic City, Millville and Camden.

(6) This corporation is solely for the public benefit and good, is worthy of the support of this State, and there is such merit in this application that your petitioner invites such inquiry on behalf of the Senate as your Honorable body may see fit to make.

Respectfully submitted this seventeenth day of January, nineteen hundred and ten.

Clarie P. Plummer,
President A-Bide-a-Wee Home for Incurables.

We, the subscribers, being duly practicing physicians in the State of New Jersey, do hereby approve of the foregoing petition and the work done by the said corporation, and that the appropriation such as is therein asked for is not in excess of the required demands.

Which on motion was adopted.

A message was received from the Governor by the hands of his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
January 25th, 1910.

To the Legislature:

Pursuant to statute, I herewith transmit the report of the Commission appointed under Chapter 110, of the Laws of 1908, entitled "An act to authorize the erection of a monument on the battlefield of Salem Church, in the State of Virginia, and a tablet on the battlefield of Spottsylvania, in the State of Virginia, to commemorate the services of the Fifteenth Regiment, New Jersey Volunteer Infantry, in the battles of Salem Church and Spottsylvania, and other engagements of the Civil War, and to appropriate money to pay the cost of the erection and dedication of the same."

The report shows that the Commission has completed its labors, and in transmitting the report permit me to say that personal inspection of the work and personal presence at the dedication enables me to commend to the Legislature the thorough and efficient way in which the Commission performed its work.

Respectfully,
JOHN FRANKLIN FORT,
Governor.

To His Excellency, John Franklin Fort, Governor of New Jersey:

SIR—The undersigned Commissioners, appointed by your Excellency under the provisions of an act of the Legislature, ap-representing the Commissioners in the absence (account of illness) of the Chairman, Honorable John F. Dryden; and Commissioner John S. Gibson; Comrades Theodore F. Swayze and Albert Whitehead, of the Fifteenth Regiment; Hon. R. Wayne Parker, of New Jersey; Col. Eugene Massie, representing the Governor of Virginia; Hon. Joseph S. Frelinghuysen, of New Jersey, and Col. Alexander S. Bacon, of New York.

The monument and tablet were unveiled by Misses Jennie Cawley and Miriam E. Gordon, daughters of Fifteenth Regiment Veterans, representing the North, and by Misses Lena Rowe and Grace Jones, daughters of Confederate Veterans, representing the South.

Other features of the event were the return to the Fourteenth Georgia Confederate Regiment of a battle-flag of that command captured by the Fifteenth New Jersey Regiment at the battle of Spottsylvania, and the presentation to Governor Fort, by Col. Massie, of a sword picked up on the battlefield of Salem Church.

The deeds for the sites of both the monument and the tablet have been deposited with the Governor, and a financial statement by the Treasurer of the Commission is hereto appended.

Respectfully submitted,

JOHN F. DRYDEN, *Chairman*,
J. W. PLUME,
JOHN S. GIBSON,
W. H. CAWLEY,
HENRY H. HOFFMANN,
A. W. WHITEHEAD,
Commissioners.

tries of the State. With funds contributed by its members, t
Commission sent the Secretary, Dr. Albert A. Snowden,
Europe last Summer to continue the study of foreign conditio
in the field of industrial education, and to get such addition
data on this subject as could be obtained. Valuable mater
concerning the methods employed in industrial schools abro
was secured, including copies of the textbooks specially compil
for the instruction in such schools.

New Jersey was the first State in the Union (in 1881)
make effective provision for State aid to industrial improveme
schools.

Your Commission, as well as employers in the various ind
tries of the State who have given the matter any study, fu
realize the lack of instruction available to those beyond the sch
age who have entered into a trade or industrial occupation. T
apprenticeship system is obsolete, due to the changed conditio
in the industries. What is needed is a method by which t
theoretical instruction bearing upon each particular trade can
made available to workers grouped by trades. This instructi
must consist of specialized drawing, mathematics, and the theo
of the subject (included under the head of industrial English
arranged in special textbooks, with special instructors famili
with the trade requirements. The mechanical or manual sk
will be obtained in the workshops in which the workers are e
ployed, and special buildings and equipment are not requir
for that purpose. This method of industrial education shou
not interfere with any vocational or manual training courses
the public schools, but should be devoted to those beyond sch
age who have gone out into the world to make their living.

Statistics show that of every twenty pupils who enter the e
mentary grades of the public schools nineteen leave permanent
before or at the age of fourteen; in other words ninety-five p
cent. It is to this large number starting out in life with but
elementary education that the State should lend its aid in order
make them proficient in the work which they set out to do.

One of the greatest drawbacks to boys entering the trades
the fact that there are no available methods for them to get t
supplemental education necessary to make them skilled workme

When a boy reaches the age of fourteen or sixteen, econom
conditions usually compel him to go to work, either to supp
himself or to assist in the support of his family. He is n
mature enough to make a selection of the occupation which
expects to follow through life, and tries one thing after anoth
until he locates in some calling which he seems best adapted f

of the Commission. There being no appropriation available f the Commission this year, its members have personally co tributed money to meet the expenses incurred, and the secretar has served without salary.

The Commission feels that the needs for industrial educatio in the great manufacturing State of New Jersey are worthy your consideration, and believes that a permanent commissio should be appointed and an appropriation for a reasonab amount should be made to carry on this work.

A message was received from the Senate, by the hands of its Secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
February 1st, 1910.

Mr. Speaker:

I am directed by the Senate to inform the House of Assembly that the Senate has concurred in the following concurrent resolution:

WHEREAS, The greatly increased cost of meat and other food has become a matter of much seriousness to the citizens of this State, and the cause would seem to justify an earnest and searching investigation, therefore be it

Resolved, That the House of Assembly (the Senate concurring) do heartily approve of the action of the administration at Washington in investigating any combination of food interests and that we do heartily endorse any further action on the part of the Federal Government looking to a correction of the present condition.

H. L. TYLER,
Secretary of the Senate.

Assembly Bill No. 44, entitled "A supplement to an act entitled 'An act to regulate elections (Revision of 1898),'" introduced January 17th, 1910, by Mr. Moore, having been erroneously referred to the Committee on Judiciary, was by the Speaker ordered referred to the Committee on Elections.

Resolved, That the privilege of the floor be extended to Judge M. E. Keffer, a former member of this House from Atlantic county.

Which, on motion, was adopted.

TRENTON, N. J., February 7th, 1910.

the Legislature:

n the twenty-sixth day of July, nineteen hundred and nine, Secretary of State of the United States officially transmitted ne as Governor of the State the proposed Sixteenth Amend- nt to the Constitution of the United States passed by The gress and directed to be submitted to the Legislatures of the eral States, as provided by the Constitution of the United tes.

opies of said papers transmitted are hereto attached.

he proposed amendment, if adopted by the requisite number States, will confer upon Congress the power to levy a direct . in the nature of an income tax, upon the property of persons the several States without regard to the inhibition now in the leral Constitution against laying any direct tax "unless in portion to the census or enumeration" by that instrument ected to be taken.

he Supreme Court of the United States sustained in principle laying of an income tax in two cases, namely:

Hylton v. *United States, 3 Dallas 171.*
Springer v. *United States, 102 U. S. 586.*

But in 1894 that Court, in *Pollock* v. *Farmers Loan and Trust mpany, 157 U. S. 429,* reversed these former decisions and lared the income tax imposed under the act of Congress, in t case, unconstitutional, because the tax was not in proportion the census or enumeration directed to be taken under the leral Constitution. The effect of this last decision is to prac- ally destroy the laying of any tax whatever upon income unless sed upon some principle of capitation.

A tax laid upon any such basis as that would be of little, if any, lue, and would fail to reach persons with large incomes who ould be the ones to bear the burden of such taxation.

An income tax is the most just and equitable tax that can be ied. It imposes the exactions of government upon the citizen proportion to his ability to bear it, and upon the basis of the alth which under the laws of the country he has been able to the State as

impair the power of the States. Neither of these suggestion seem to me to have force.

Suppose a one per centum of tax were to be levied upon ir comes. Under such a tax the holder of a one thousand dolla four per cent. State or municipal bond would pay an income ta on forty dollars per year, which would amount to forty cent per annum.

If the patriotism of our citizens and the interest of our financia institutions, who take and hold State and municipal securities, i at so low an ebb as to cause such a tax to affect the value of Stat or municipal securities, we are, indeed, in an unfortunate cor dition in the Republic. No one can believe that such a conditio exists.

As to the claim that the Federal government might injure th States, as such, by taxing State bonds under an income tax, ther are two satisfactory answers:

First. The Congress is representative of the States, and electe by the citizenship thereof, and the remedy is in the hands of th people of the States by not returning such Congressmen.

Second. The patriotism of our people is such that no Congres could be elected that would lay any tax with a view of destroyin the power or integrity of the States. If this be not true, th relation of our States to the Republic is surely of much les importance than many of us have hitherto supposed.

Under a Republican form of government the people rule, an they can be safely trusted to see that their representatives mak no unjust exactions in the way of taxation or in the curtailing c the rights of the State or otherwise. Nor am I inclined to accep the statement that the Supreme Court of the United Stat might construe the words "from whatever source derived" a found in the pending amendment as justifying the taxing c the securities of any other taxing power. There is no expres provision in the Federal Constitution at present prohibiting th Congress from imposing an income tax upon the securities of State. Yet in the Pollock case (*supra*) the Court held, speak ing through Chief Justice Fuller, at page 583, as follows:

"The Constitution contemplates the independent exercise b the nation and the State, severally, of their constitutional power

JOINT RESOLUTION

Proposing an amendment to the Constitution of the United States.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which, when ratified by the Legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution:

"Article XVI. The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration."

J. G. CANNON,
Speaker of the House of Representatives.
J. S. SHERMAN,
Vice-President of the United States and
President of the Senate.

Attest:
A. McDOWELL,
Clerk of the House of Representatives.
CHARLES G. BENNETT,
Secretary.
by HENRY H. GILFRY,
Chief Clerk.

I certify that this Joint Resolution originated in the Senate.

CHARLES G. BENNETT,
Secretary.

Honorable Frank S. Katzenbach, Jr., Trenton.

On the ninth day of November they met in the Executive Reception Room at the Capitol, and organized by the selection of the Honorable Frank O. Briggs as chairman, Honorable Charles J. Fisk as vice-chairman, Colonel William Libbey as secretary, and Mr. William L. Doyle as treasurer; subsequently an executive committee was named. Meetings have been held, and the Commission now feel that some plan of the kind contemplated is practical.

At the last meeting of the Commission, a request was made of the Governor that he ask the Legislature to give the movement official standing. This suggestion meets with my approval, and I recommend that a joint resolution be passed, authorizing the appointment of a "Washington's Crossing Commission," that they may take up the matter with the Federal Congress, with the authority of the State as the basis of their action. When the joint resolution shall be adopted, the same gentlemen can be appointed under it as a State Commission and prosecute their public-spirited work with greater assurance of success. STATE OF NEW JERSEY,
SENATE CHAMBER,
February 8th, 1910.

Mr. Speaker:

I am directed by the Senate to inform the House of Assembly that the Senate has concurred in the following Concurrent Resolution:

WHEREAS, Since February 15th, 1898, the wreck of the battleship Maine, with the score or more of sailors who went down to an ocean grave, has remained at the bottom of Havana habor, a menace to shipping; and

WHEREAS, A bill introduced by the Hon. Wm. Sulzer, of New York, in Congress, for the removal of the wreck and the proper interment of the bodies of the seamen therein contained is being advocated for passage; be it therefore

Resolved (the Senate concurring), That the people of the State of New Jersey, in legislature assembled, urgently request the New Jersey Senators and Representatives in Congress to do their utmost to obtain immediate action on the bill introduced by Representative Sulzer, or some similar bill.

HOWARD L. TYLER,
Secretary of the Senate.

A message was received from the Senate, by the hands of its Secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
February 7th, 1910.

fr. Speaker:

I am directed by the Senate to inform the House of Assembly iat the Senate has concurred in the following Concurrent Reso- on referring to the planting and laying out of oysters in the aters of the State of New Jersey:

WHEREAS, One of the largest and most important industries f this State is the growing and shipping of oysters; and

WHEREAS, By reason of the natural facilities, the oysters of aid State may be laid out, which natural process develops, fattens and perfects the oyster in such a manner that the oysters of he State are equaled by none in the world; and

WHEREAS, The United States Pure Food Commission has is- ued an order prohibiting such laying out of oysters in the waters of the said State of New Jersey, which said order will become perative on the first day of May, of the present year, and will, f enforced, be the means of putting the New Jersey oyster in he class with less desirable oysters of other States, not having uch aforesaid natural facilities, and will be the means of practi- ally ruining the said great New Jersey oyster industry, which is, s yet, only partially developed; therefore be it

Resolved by the House of Assembly (the Senate concurring), That the members of this Legislature take the matter up with the United States Senators of this State and their several respective members of Congress, and urge upon said national representatives the importance of the oyster industry of their State and the disastrous effect which said order of the Pure Food Commission will have upon said oyster industry, if enforced, to the end that said national representatives may become thoroughly conversant with the conditions concerning the oyster industry and will use their voice and influence in having the aforesaid order rescinded; and be it

Resolved, That a copy of this resolution, signed by the President and Secretary of the Senate and the Speaker and Clerk of the House of Assembly, be sent to each of the Senators and Representatives from the State of New Jersey.

H. L. TYLER,
Secretary of the Senate.

A message was received from the Governor by the hands of his Secretary, and was read as follows:

February 14th, 1910.

To the Legislature:

Herewith I transmit the report of the New Jersey State Tuberculosis Commission to which reference was made in my Second Annual Message.

The State of New Jersey should foster in every way possible proper institutions for the treatment of persons afflicted or threatened with tuberculosis, and the recommendations contained in the report of the Commission herewith submitted are commended to the favorable consideration of the Legislature.

Respectfully submitted,

JOHN FRANKLIN FORT,
Governor.

STATE TUBERCULOSIS COMMISSION.

Authorized by the Legislature of 1909.
Appointed by His Excellency the Governor, John Franklin Fort.
Rt. Rev. James A. McFaul, Chairman.
Dr. William G. Schauffler, **Mrs. Sidney M. Colgate,**
Mr. William C. Smallwood, **Mrs. William S. Stryker.**

To His Excellency Governor John Franklin Fort and the Honorable Legislature of the State of New Jersey:

Inasmuch as your Commission finds that the existing hospitals and sanatoria in this State are inadequate; that the State Sanatorium for incipient cases accommodates but 121 patients; that additional municipal and county sanatoria make a total provision for only 330 incipient cases; that there is municipal and county provision for only a similar number of advanced cases, and that there were, last year, 3,749 deaths from tuberculosis in this State, your Commission recommends:

1. That the facilities at Glen Gardner be increased by the addition of moderate priced shacks.

   That provision be made at Glen Gardner for arrested cases, as at Eudowood Sanatorium, Maryland, by converting one of the farm-houses into a residence for them, or by the erection of inexpensive buildings for their accommodation, the patients to do farm or other work in connection with the institution, thereby being self-supporting until a cure is assured.

   That an appropriation of $5,000 be made for the erection and equipment of a separate shack at Glen Gardner for the care of tuberculous children, of whom there are at present in the institution 17 under 16 years of age. Also that provision be made for school instruction for these children.

   That the Board of Managers of Glen Gardner, in order to save the State unnecessary expense, be advised to authorize a most careful investigation of the financial status of every patient admitted, with a view to making every one, able to do so, pay according to his own or his family's ability.

February 14th, 1910.

To the Legislature:

I herewith transmit two communications, one received from the Department of State of the United States, and the other from Honorable George B. McClellan, when Mayor of the city of New York, in relation to the water conditions on Staten Island and in the borough of Richmond.

As proposed acts are now pending before you touching the question of the transportation of waters from this State to Staten Island, and as these letters bear upon the subject, I deem it to be my duty to transmit them that you may be in possession of the facts contained therein.

Respectfully submitted,
JOHN FRANKLIN FORT,

January 28th,

His Excellency the Governor of New Jersey, Newar
Jersey:

Sir—For a number of years past the question of the
water supply for the military posts and reservations on
Island, New York, has given the War Department of the
States serious concern. The present supply is inadeq
amount, and seriously objectionable upon sanitary groun
is obtained from wells, from which no greater quantity
now supplied can be expected in the future. The pumping
are located at the eastern extremity of the island, and wo
liable to dstruction by the fire of a hostile fleet in time of

It is represented to me by the Secretary of War that th
ough of Richmond, through its president, Mr. George Cror
has been engaged for several years past in an effort to secu
introduction of an adequate water supply from the adjacent
land, the water being brought under gravity pressure fro
mountains in northern New Jersey; that to that end a cor
was entered into between the State of New York and the Hu
County Water Company, which promised to effect relief t
existing conditions on Staten Island; that after the contract
been approved by the Board of Estimate of the State of
Jersey, the Legislature of that State enacted a law which
hibited the carrying of water to adjacent States from a sourc
supply within the territorial limits of the State of New Jer
and that it is understood that the legislation so enacted was
gested by an apprehension that the supply obtained in the op
tion of the contract was intended to furnish water to a la
portion of the population of Greater New York than is es
lished on Staten Island, but such, the Secretary of War st
he is advised, was not the case.

Under date of February 8th, 1906, my predecessor address
letter to your predecessor, His Excellency Edward C. Sto
asking his good offices in submitting the matter to the Leg
ture of New Jersey, with a view to such modification of the le
lative provision adopted as would be calculated to except
its operation the coast defences which had been established

Staten Island for the protection of the cities located at the southern entrance of New York harbor.

The Legislature of New Jersey, it is understood, declined to modify its existing law at that time, as a case affecting the validity of its statutes was before the courts. At that time no contract had been entered into by the War Department with a view to increase the water supply at the military reservation on Staten Island.

Since that presentation of the matter the conditions in respect to the water supply at Fort Wardsworth have become steadily worse, and to meet the emergency the War Department has entered into a contract with the Hudson County Water Company for a supply of water from the New Jersey mainland upon an undertaking annually renewable for a period of twenty years.

It is hoped that Your Excellency will see the necessities of the case, and will favorably recommend the matter to the Legislature of the State, with a view to such modification in the existing law as will exempt the United States military reservations and other government establishments situated on Staten Island from its provisions. It is respectfully suggested that the emergency might be met by a provision withdrawing these reservations and establishments from the operation of the legislative prohibition for such period of time, not exceeding twenty years, as will enable an adequate water supply to be obtained from the Adirondack reservoirs or from some other suitable source. I shall appreciate very much your good offices in the matter.

I have the honor to be, Sir,

Your obedient servant,
For Mr. Knox,
HUNTINGTON WILSON,
Assistant Secretary of State.

CITY OF NEW YORK,
OFFICE OF THE MAYOR, December 29th, 1909.

To the Honorable J. Franklin Fort, Governor of the State of New Jersey, Trenton, New Jersey:

land of New Jersey a limited supply of water necessary for th inhabitants and Government service on Staten Island, which, a the Borough of Richmond, forms part of the City of New Yorl

Staten Island is separated from the rest of the city by a larg body of salt water, has no connection with our great city rese voirs, and within its own territory there cannot be procured sufficient quantity of pure water to supply the needs of the prese population of about eighty thousand people, or to provide for th rapidly increasing population in that territory.

The United States Government has important fortifications c the Island, as well as lighthouses, marine hospital and other i stitutions, and these have to be provided with water from th regular city supply. It is hoped that in the course of a few yea sources of water supply will be developed in our own State an aqueducts constructed which will enable us to furnish all th may be needed for the use and development of Staten Island, b until that provision can be made we must depend upon a suppl from the State of New Jersey, as supply from the Island itself inadequate.

The problem has been passed upon by Mr. John R. Freema Mr. William H. Burr, Mr. Rudolph Hering, and a number c other distinguished hydraulic engineers, so that the conclusio which I here state are not mine but theirs, and you will readil see how important it is to this city, especially the Borough c Richmond, that an adequate supply of water should be procure from the State of New Jersey.

I understand that the motive which induced the Legislature c New Jersey, in 1905, to prohibit the taking of surface water fro the State was not affected by the taking of so small a quantity c water as might be used for the next five or ten years by th Borough of Richmond, but by an apprehension that there woul be a larger diversion.

In view of the objection to the transportation of water fro surface sources, I believe that provision has now been made fc the supplying of Staten Island from subterranean sources in Ne Jersey, and that objection is now also being raised to water fro such sources being taken out of the State. Would it not b possible for the State of New Jersey to thoroughly safeguard i interests by legislation both as to surface and subterranean water, but to except therefrom the fulfillment of any existing contract, and to limit the amount to be taken thereunder both as to the quantity to be diverted and the period of the continuance thereof?

I need hardly suggest as an additional reason for the exercise of inter-State comity on the part of the State of New Jersey, that this Island lies in close proximity to New Jersey, and that in a great many respects its prosperity would be beneficial to portions of your State contiguous to it.

Independent, however, of whatever possible advantages might accrue to the State of New Jersey, the situation is a sufficiently serious one to justify me in appealing to you for your personal and official co-operation, especially as the quantity which the city would be required to purchase for the use of the Borough of Richmond would not be a serious loss to the water supply of any section of the State of New Jersey.

I shall feel under a personal obligation to you if you will give this matter speedy and serious consideration, and I am sure that my sentiment will be shared by the people of the City of New York.

Respectfully yours,
Geo. B. McClellan,
Mayor.

Mr. Edge moved that the Governor's message be received, spread in full upon the minutes and 500 copies be printed for the use of the members.

Which, on motion, was adopted.

A message was received from the Governor by the hands of his Secretary, and was read as follows:

February 14th, 1910.

To the Legislature:

I herewith transmit the report of the New Jersey Inter-State Bridge Commission. This Commission was appointed by Joint Resolution No. 3, approved April 2d, 1908. By the provisions of the second section of that resolution, five thousand dollars was appropriated to defray the expenses of the Commission, but the Supplemental Appropriation Bill for that year only gave them one thousand dollars of that amount. The Commission, while it incurred considerable expense, failed to make application for the one thousand dollars appropriated in the Supplemental Appropriation Bill, and that sum lapsed into the treasury of the State.

By Chapter 122, of the Laws of 1909, this Commission was continued for another year, but again no appropriation was made to meet the unexpended balance of the amount originally appropriated, but by Item No. 35 in the Supplemental Appropriation Bill of 1909, bills of the Commission amounting to $3,321.87 were provided for and paid, leaving of the five thousand dollars originally granted by Joint Resolution No. 3, approved April 2d, 1908, the sum of $1,678.13, which has never been appropriated to the Commission for its use. The bills of the Commission which have been incurred and paid during the past year have been met by the private subscription of the Commissioners themselves.

I recommend that the Commission be made permanent, or the Governor authorized to appoint a permanent Commission, as the Legislature may prefer, and that a reasonable appropriation be made toward the expenses incident to the work of the Commission.

The State of New York last year appropriated twenty-five thousand dollars toward defraying the expenses of the New York members of the Joint Commission.

That an inter-state bridge is possible is now conceded by all engineers, and the place of the location of such a bridge seems also to be fixed by common consent.

The topography at One Hundred and Seventy-ninth street, New York City, and opposite that point on the New Jersey shore, seems to indicate that nature has provided the place for the bridge. The bridge on the New Jersey side may rest against the Palisades, and on the New York side a vast area of rock, which extends up to the surface of the earth, makes a natural foundation for such a structure. The cost of a bridge at this point would probably not exceed eight million dollars, while from two and a half to three times this expenditure would be necessary at any of the points farther down the river.

New Jersey should, either as a State or through a district of the State, join in this enterprise. The least that we can do is to confer with the State of New York upon the subject and put our Commission in possession of a reasonable amount of funds for further investigation and preliminary work looking to the construction of a bridge.

When this bridge project is considered in connection with the proposed Hendrick Hudson drive, and the great public park made possible through the gift of Mrs. Harriman and a number of private citizens in New York State, its importance is made manifest, as well as the fact that it will be a business proposition which will produce sufficient revenue to provide for its cost after it is once constructed.

The whole subject is commended to you for your favorable action on the lines laid down in the report of the New Jersey Commissioners, which is herewith transmitted.

Respectfully submitted,
JOHN FRANKLIN FORT,

REPORT OF THE NEW JERSEY INTER-STATE BRIDGE COMMISSION TO THE LEGISLATURE OF THE STATE OF NEW JERSEY.

To the Honorable Senate and General Assembly of the State of New Jersey:

The subscribers beg to submit the following report:

By Joint Resolution No. 3, Session of 1908, Pamphlet Laws, page 727, the Legislature provided for a Commission of five members appointed by the Governor of the State "to co-operate and confer with the New York Commission and fully investigate the project of constructing one or more bridges over the waters between New York and New Jersey, at the joint expense of the two States, and to report to the Legislature their conclusions on the subject, with such data as they may gather," and an appropriation was made therefor.

By virtue of the above resolution the following commissioners were appointed: Anthony R. Kuser, of Somerset county; Frank R. Long, of Bergen county; Frederick N. Eberhard, of Hudson county; Victor L. Mason, of Passaic county, and Elias D. Smith, of Union county.

In the absence of reliable engineering data an exhaustive study of all the other phases of the question was made and a report was submitted to the Legislature the following year (1909), in which your Commissioners expressed the belief "that a bridge across the Hudson river is a necessity for the accommodation of vehicular, foot-passenger and traction-line traffic."

This conclusion was reached after considering the testimony given at the regular meetings of the Commission and at a series of public hearings which were called in New York City and in the State of New Jersey for the purpose of affording the people of both States an opportunity to express their views with respect to a bridge or bridges across the Hudson river.

By Chapter 122, Laws of 1909 (approved April 16th, 1909), your Commission was continued in office for one year, and was authorized to receive and expend such moneys then unexpended as had been appropriated to its use. Further provision was made whereby the board of chosen freeholders of any county in the State was authorized to appropriate and give to your Commission any sum, not exceeding ten thousand dollars, for the purpose of determining the most appropriate type and location of a bridge or bridges, to make proper soundings and borings for the approaches and piers of same and to compile such data as would secure definite knowledge concerning the rock formation of the river bottom at different points, which data your Commission considers desirable and absolutely necessary before selecting a site.

Three days after the passage of the New Jersey act the Legislature of the State of New York passed a lew appropriating twenty-five thousand dollars, or any part thereof, to defray New York's proportion of the expense of determining the most advantageous location for a bridge or bridges. This appropriation was made with the understanding that funds for the expense of borings and surveying would be available therefrom as soon as our State or any county or counties thereof should appropriate moneys for a similar purpose.

At the time of the passage of the New Jersey law, April 16th, 1909, the budgets for 1909 of the different counties contiguous to the Hudson river had been made up and your Commission was informed that no funds were available from this source. Hence it has been impossible for your Commission to secure funds, for which provision was made by the act of April 16th, 1909, above referred to. In consequence of the inability of the New Jersey Commissioners to provide for New Jersey's share of the expense of preliminary engineering, etc., the appropriation made by the State of New York has been unavailable.

Notwithstanding this situation your Commission, in conjunction with the New York Commission, has continued its study of this most important question. Considerable time has been devoted to an investigation of the available sites, having in mind the best service to the greatest number of people in both States. Regular meetings have been held by the Commission throughout the past year for the purpose of informing itself more fully of the sentiment of the people of the State as presented to it at such meetings. Maps and data have been secured with regard to topographical conditions on both sides of the Hudson river and which, in connection with the testimony taken at the above meetings of the Commission, have proved of considerable value in the consideration of the question of a bridge connecting the State of New Jersey with the City of New York.

With a view of obtaining an accurate knowledge of the legal status of all companies with charters to build a bridge over the Hudson river between New York City and the State of New Jersey, the Joint Commissions have caused to be prepared during the year a report containing a comprehensive investigation of this question and have had annexed thereto all statutes of the United States and the States of New York and New Jersey relating to such projects; a summary of this compilation will be found (Appendix A) annexed hereto.

The Joint Commission have procured from their consulting engineers, Messrs. Boller & Hodge, an estimate of the approximate cost of preliminary borings at the different sites heretofore recommended to the consideration of your Commissioners.

In June of 1909, through the courtesy of a citizen of New York, Mr. R. A. C. Smith, who tendered the use of his yacht for the purpose, the Joint Commissions, with the Governors of the State of New Jersey and the State of New York, were enabled to make an extensive and careful inspection of the various bridge sites under consideration. There were also present, members from the New York and New Jersey Legislatures, a representative of the Federal Government, members of the Boards of Freeholders of Bergen, Passaic, Hudson and Essex counties, as well as other county officials.

In view of the action of the Legislature of New York in making an initial appropriation of twenty-five thousand dollars, your Commissioners are of the opinion that they should be put in funds from our State for the purpose of defraying New Jersey's share of the expenses of the Joint Commissions, until such time as may become available the appropriations from one or more counties, as provided for in the act passed April 16th, 1909, and above referred to.

From the appropriation of $5000 granted your Commission in 1906 there was expended up to November 1st, 1909, $3,321,87, leaving a balance which reverted to the treasury of $1,678.13. Since that date New Jersey's share of the expense of the Joint Commissions has been defrayed by the private subscriptions of your Commissioners.

The Commissioners are serving without pay.

All of which is respectfully submitted.

ANTHONY R. KUSER,
F. N. EBERHARD,
F. R. LONG,
V. L. MASON.

Dated January 28th, 1910.

NOTE.—Owing to the absence abroad of Commissioner Elias D. Smith this report was not submitted to him.

APPENDIX "A."

With respect to the various companies heretofore chartered for bridging the Hudson river between New York City and New Jersey, the attention of the Legislature is directed to the following facts:

In 1868, the State of New Jersey passed two acts incorporating the New York and New Jersey Bridge Company and the

New Jersey and New York Bridge Company, respectively, authorizing the construction of a bridge over the Hudson river between New York and New Jersey.

The act incorporating the New York and New Jersey Bridge Company (Laws of New Jersey, 1868, Chap. 520, page 1136) provided for the construction of a bridge over the Hudson river between some suitable point in the City of New York and a point north of the southerly line of the township of Union, in the county of Hudson, in the State of New Jersey (par. 5).

The act incorporating the New Jersey and New York Bridge Company (Laws of New Jersey, 1868, Chap. 388, page 876) provided for the construction of a bridge across the Hudson river, to commence at some point on the Palisades, at or near Fort Lee, in the State of New Jersey, and to cross said river at some point at or near Fort Washington, or Washington Heights, so called, in the State of New York, or any more suitable point on said Palisades, in the county of Bergen, in the State of New Jersey, to some suitable point on the opposite shore in the State of New York (par. 7).

In 1890, the Legislature of the State of New York incorporated the New York and New Jersey Bridge Company (Laws of New York, 1890, Chap. 233), with power to construct and operate a bridge over the waters between New York City and the State of New Jersey (sec. 1).

In 1890, by act of Congress, approved July 7th (51st Congress, 1st Session, 1889–1890, Chap. 669), the North River Bridge Company was incorporated, and authorized to construct a bridge across the Hudson river, between the city of New York and the State of New Jersey (sec. 1).

The public records do not disclose any other corporate projects, by special legislative acts, for bridging the Hudson river between New York City and the State of New Jersey.

THE NEW YORK AND NEW JERSEY BRIDGE COMPANY.

The New Jersey act incorporating the New York and New Jersey Bridge Company (Laws of 1868, Chap. 520, page 1136), approved April 17th, 1868, provided "that said company shall have power to procure the right of way and lands necessary to carry out the objects of this act, either by purchase or appraisement by commissioners in the manner prescribed in and by the original charter or act of incorporation of the New Jersey Railroad and Transportation Company" (par. 9); and, also, "that the construction of the said bridge shall be commenced within three years, and shall be completed within five years from the time when this act shall take effect, or this act and all rights and privileges granted hereby shall be *null and void*" (par. 10); and, also, "that this act shall take effect when the Legislature of the State of New York shall pass a law appointing commissioners on their part, and vesting like power and authority in the subscribers to the said capital stock of erecting the bridge as aforesaid, and with as full and ample powers, privileges, francises and emoluments as to the said company are hereby given" (par. 11).

The New York act incorporating the New York and New Jersey Bridge Company (Laws of 1890, Chap. 233), became a law April 30th, 1890, upon which date, therefore, the New Jersey act took effect pursuant to paragraph eleven of the New Jersey charter. The New York company was empowered (par. 16) "to merge and consolidate its capital stock, franchises and property with the capital stock, franchises and property of any other corporation or corporations," subject to the restrictions and liabilities prescribed in "An act authorizing the consolidation of certain railroad companies" (Laws of 1869, Chap. 917, and amendments thereto). Said act also provided (par. 19) for the appointment of commissioners by the Governor of the State of New York "to locate said bridge, appurtenances and approaches thereto and stations, which location shall not be changed except by and with the consent of a majority of the five commissioners so appointed and named, or their successors." And it was also provided in said act that "the terminus of said bridge in the city of New York shall not be below 10th street nor above 181st street in said city" (par. 26); and, also, "said bridge shall be commenced on or before January 1st, 1892, and shall be completed and opened for use on or before January 1st, 1897" (par. 27).

In 1891, the Legislature of New Jersey passed an act entitled "A supplement to an act entitled 'An act concerning corporations' (Revised), approved April seventh, one thousand eight hundred and seventy-five" (laws of 1891, Chap. 86, page 141, approved March 16th, 1891), which act affected all corporations theretofore created by the State under general or special acts with charters limited to take effect only upon the happening of some future condition, or event, or proceedings to be taken, therein named; said law provided that such acts should take effect after a majority of the persons interested should make and sign in writing and file with the Secretary of State an acceptance by them duly acknowledged of the provisions of this act, and an agreement, to be approved by the Governor and Attorney-General, surrendering to the State all rights of exemption from taxation, and agreeing further that any law affecting such parties shall be subject to alteration or repeal by the Legislature.

By an instrument executed May 8th, 1891, duly approved and filed in the office of the Secretary of State of New Jersey, the New York and New Jersey Bridge Company of New Jersey complied with such statute.

In 1892, the Legislature of New Jersey by Chapter 253, Laws 1892, passed "An act authorizing bridge companies authorized under the laws of this State or of any other lawful authority to build and maintain a bridge or bridges over, in, upon or across any part of any of the navigable waters separting this State from any other State, to enter into a union or joint contract or agreement for the purpose of building, maintaining and operating such bridge or bridges, together with the necessary or proper connections and appurtenances and approaches thereto and stations, as one single consolidated work, whenever the whole or a portion of the respective lines of said bridge or bridges may or do embrace the same location or their locations may or can connect or become tributary to each other." Pursuant to said statute the New York and New Jersey Bridge Company of New York and the New York and New Jersey Bridge Company of New Jersey entered into an agreement of union and consolidation, which instrument was duly filed in the office of the Secretary of State of New Jersey, April 5th, 1892.

In 1894, Congress passed an act (Chap. 101, approved June 7th, 1894) entitled "An act to authorize the New York and New Jersey Bridge Companies to construct and maintain a bridge across the Hudson river between New York City and the State of New Jersey," which act provided that " the location of said bridge shall be subject to approval by the Secretary of War, upon such examinations, hearings and reports as he shall hereafter prescribe ; *provided,* that it shall not be located below Fifty-ninth street, New York City, nor above Sixty-ninth street, New York City" (par. first); and, also, "that the location of all approaches to said bridge in the city of New York shall be approved by the commissioners of the sinking fund of the city of New York," and "that no railroad or railroads shall be operated on the approaches of said bridge companies in the city of New York, except on such approaches as shall have been approved by the sinking fund commissioners of the city of New York" (par. second), and, also, that "the said company or companies availing themselves of the privileges of this act shall file an acceptance of its terms with the Secretary of War, and shall submit to the Secretary of War, within one year after the passage of this act, for examination and approval, drawings showing plan and location of the bridge and its approaches; and the construction of said bridge shall be commenced within one year after said location and plans have been approved of as herein provided; and said company or companies shall expend, within the first year after construction has commenced as herein required, not less than two hundred and fifty thousand dollars in money, and in each year thereafter not less than one million of dollars in money in the actual construction work of said bridge, which shall be reported to the Secretary of War; and the said bridge shall be completed within ten years from the commencement of the construction of the same as herein required; and unless the actual construction of said bridge shall be commenced, proceeded with and completed within the time and according to the provisions herein provided, this act shall be *null and void*" (par. seventh).

In 1895, the commissioners appointed under Chapter 233 of the Laws of 1890, of the State of New York, to locate said bridge, changed the location of said bridge theretofore made by them, and located said bridge, its anchorages and abutments as follows: "Said location shall be on a center line beginning at a point in New Jersey on the west side of the Hudson river at a point where a line drawn midway between the southerly line of West Fifty-ninth street in the city of New York produced and the northerly line of West Sixtieth street in the city of New York produced, intersects the westerly line of the anchorages of said bridge in the State of New Jersey; thence running easterly along said line drawn parrallel to and midway between the southerly line of West Fifty-ninth street produced, and the northerly line of West Sixtieth street produced, to a point one hundred feet west of eleventh avenue or West End avenue where it intersects the easterly line of the anchorage of said bridge in the city of New York." (December 3d, 1895, Andrew H. Green, Evan Thomas, Isador Straus, Commissioners.)

In 1895, the Legislature of the State of New Jersey passed a general act (Laws of 1895, Chap. 265, page 501, approved March 22d, 1895) which extended the time limited for the commencement and completion of the projected bridge of the New York and New Jersey Bridge Company, for the further period of ten years from the passage of said act. This act required that corporations seeking to take advantage of its provisions should file an agreement waiving any rights of exemption from taxation, and further agreeing to bound by any general law of the State then in existence, or any thereafter passed, in respect to taxation, and agreeing further, that all laws affecting such corporation should be subject to alteration or repeal by any Legislature.

By an instrument executed July 6th, 1895, duly approved and filed in the office of the Secretary of State of New Jersey (July 16th, 1895—Book J "Corporations," page 165), the New York and New Jersey Bridge Company complied with said statute. Subsequently, and by instrument executed November 26th, 1897, duly approved and filed in the office of the Secretary of State of New Jersey (November 30th, 1897), the New York and New Jersey Bridge Company supplemented its agreement of May 8th, 1891, setting forth more fully its compliance with said statute.

In 1896, the New York and New Jersey Bridge Company duly submitted to the War Department for its action, as required by the Act of Congress (*supra*), plans for the bridge, which "were approved originally by instrument dated March 13th, 1896, but plans showing certain modifications proposed to be made in the construction were subsequently submitted to and approved by the Secretary of War, July 3d, 1900." The approved map of location shows the New York terminus to be located between West Fifty-ninth and West Sixtieth streets, New York City, and the New Jersey terminus in the vicinity of the south line of Union township. (Letter of the Chief Engineers, U. S. A., to Counsel.)

In 1896, the Legislature of the State of New York extended the time of the company to complete the construction of the bridge, by Chapter 67 of the Laws of 1896, which amended Section 27 of Chapter 233, of the Laws of 1890, as follows: "Section 27. Said bridge shall be commenced on or before January 1st, 1892, and shall be completed and open for use on or before January 1st, 1907."

The Commissioners of the Sinking Fund of New York City, having first disapproved a location for the bridge in the neighborhood of West Sixty-ninth street, finally, by resolution passed February 11th, 1896, aproved the location of the bridge at West Fifty-ninth and Sixtieth streets, as set forth in the certificate of the commissioners appointed purusant to Chapter 233 of the Laws of 1890, of the State of New York, dated December 3d, 1895, and also approved the approaches to said bridge with a station at Broadway, between Forty-ninth and Fiffy-first streets, as fixed and certified by said commissioners in an instrument executed by them, dated January 20th, 1896.

By proclamation of the Governor of the State of New Jersey, dated January 2d, 1906, the charter of the New York and New Jersey Bridge Company, granted by the State of New Jersey, was repealed for non-payment of taxes, pursuant to the provisions of the Corporation Act of New Jersey, and in the same year a bill introduced in the New York Legislature further extending the time of the New York and New Jersey Bridge Company to complete the construction of its bridge failed of passage.

The New York charter of the New York and New Jersey Bridge Company (Act of 1890), provided that the bridge "shall be commenced on or before January 1st, 1892, and shall be completed and open for use on or before January 1st, 1897." (Sec. 27.)

Section 27 of the Act of 1890 (*supra*), was amended by Chapter 67 of the Laws of 1896, so as to read: "Sec. 27. Said bridge shall be commenced on or before January 1st, 1892, and shall be completed and open for use on or before January 1st, 1907."

In the Legislature of 1906 a bill was introduced further extending the time, but failed of passage.

There can be no question but that the New York charter of the New York and New Jersey Bridge Company has lapsed, and the Attorney-General can at any time commence proceedings against the company for forfeiture of its corporate rights, pursuant to section 131 of the General Corporation Law, Chapter 23, Consolidated Laws (formerly section 1798, Code of Civil Procedure).

The New Jersey charter (L. 1868, Chapter 388), provided for commencement of the bridge within three years and its completion with five years from the time the charter took effect, which was when the New York charter was granted, to wit, April 30th, 1890. By Chapter 265, Laws of 1895, the Legislature extended the time for commencement and completion ten years from March 22d, 1895, thus bringing it down to March 22d, 1905. By proclamation of the Governor of New Jersey, dated January 2d, 1906, the charter was repealed for non-payment of taxes, pursuant to the provisions of "An act to provide for the imposition of State taxes upon certain corporations and for the collection thereof." (Laws 1884, Chapter 159, as amended.) (Sec. 155 N. J. Corporations Act.)

The New York and New Jersey Bridge Company by its agreement with the State of New Jersey, dated May 8th, 1891, duly approved and filed in the office of the Secretary of State, pursuant to the provisions of Chapter 86, Laws of 1891, and by its two agreements pursuant to Chapter 265, Laws 1895, duly approved and filed in the office of the Secretary of State, July 16th, 1895, and November 30th, 1897, respectively, is bound by the amendments to the General Corporation Law. Now, while section 161 of the New Jersey Corporation Act provides for the reinstatement of corporations, whose charters have been repealed by proclamation of the Governor, upon payment of such sum in lieu of taxes and penalties as to the Governor, by and with the advice of the Attorney-General, may seem reasonable, such benefit is explicitly withheld from certain classes of corporations by a clause in said section contained excluding, among other classes, any "corporation having the right to use the public streets or *to take and condemn lands in this State.*" The New York and New Jersey Bridge Company, under its organic act having power "to condemn lands in this State," is clearly within said provision, and hence its charter cannot be reinstated under section 161 of the General Corporation Law.

The charter granted by Act of Congress in 1894, provided, "the construction of said bridge shall be commenced within one year after said location and plans have been approved of as herein provided (*i. e.,* by the Secretary of War); and said company or companies shall expend, within the first year after construction has commenced, as herein required, not less than $250,000 in money, and in each year thereafter not less than one million dollars in money in the actual construction work of said bridge, which shall be reported to the Secretary of War; and the said bridge shall be completed within ten years from the commencement of the construction of the same, as herein required; and unless the actual construction of said bridge shall be commenced, proceeded with and completed within the time and according to the provisions herein provided, this act shall be null and void." (Par. seventh.)

The location and plans of the proposed bridge were submitted to the Secretary of War and approved by him, March 13th, 1896, and certain modifications in the construction were subsequently approved.

In 1897, we find that Mr. Delos E. Culver, former Chief Engineer of the company, made an affidavit (November 26th, 1897; filed with the Secretary of State of New Jersey, November 30th, 1897), which throws considerable light upon the expenditures of the company for construction work down to that date, as follows:

"That to the personal knowledge of deponent, said bridge company actually expended in money, since January 1st, 1886, more than seven thousand dollars in surveys and in location of route for said bridge; also (since January 1st, 1886), four thousand dollars in acquisition of right of way for said bridge, being land actually purchased by and still owned by said bridge company for such purpose; also (since January 1st, 1886), at least *seven hundred and fifty dollars in construction of said bridge;* and that all of said expenditures were made while deponent was as aforesaid chief engineer of said bridge company."

It remains for the company to show that within one year from March 13th, 1896, it begun the construction of the bridge, and within the subsequent year spent not less than two hundred and fifty thousand dollars, and one million dollars each subsequent year, in the actual construction work.

Furthermore, the Act of Congress required the commencement of construction within one year after approval of the plans (*i. e.,* before March 13th, 1897), and completion within ten years from commencement (*i. e.,* March 13th, 1907).

It seems that the New York and New Jersey Bridge Companies have not complied with the conditions prescribed by the Act of Congress of 1894, and the charter granted thereunder is subject to forfeiture.

THE NORTH RIVER BRIDGE COMPANY.

The North River Bridge Company was incorporated by an Act of Congress of the United States, approved July 11th, 1890 (51st Congress, 1st Session, 1889-90, Chapter 669), entitled: "An act to incorporate the North River Bridge Company and to authorize the construction of a bridge and approaches at New York City across the Hudson River, to regulate commerce in and over such bridge between the States of New York and New

Jersey, and to establish such bridge a military and post road." (26 U. S. Statutes at Large, page 268.)

Section two of said act provided "that the construction of said bridge shall be commenced within three years after the passage of this act and shall be completed within ten years after commencement of construction; but that the Secretary of War is hereby authorized to extend the time for the commencement of construction for two additional years upon cause shown by the company, and provided that the Secretary of War shall deem such cause sufficient and satisfactory; and that if the company fail to commence the construction of said bridge with the time so extended, this act shall be null and void. * * * But until the Secretary of War approve the plan and location of said bridge, the erection of the same shall not be commenced; and should any change be made in the plan of the bridge during the progress of the work thereon, such change shall likewise be subject to the approval of the Secretary of War."

In 1901, by Act of Congress, approved February 8th, 1901 (2nd Session, Chapter 343; 31 U. S. Statutes at Large, page 762), the organic act of the North River Bridge Company was amended so as to extend the time for the completion of the construction of the bridge until the first of January, 1912.

In 1907, by Act of Congress, approved March 2d, 1907 (River and Harbors Act, sec. 6), the North River Bridge Company was given permission to relocate its lines.

The North River Bridge Company originally located a line from West Twenty-third street, New York City, to Hoboken, New Jersey. The plans for this location, approved by the Acting Secretary of War, December 29th, 1891, show an approach "from a point between Twenty-first and Twenty-second streets, in New York City, to a point between Twelfth and Thirteenth streets in Hoboken, and apparently contemplate the construction of viaducts extending to Eighth avenue and Twenty-sixth street, New York City, and to Jersey City, New Jersey." (Letter of June 16th, 1909, War Department to Counsel.)

At the Hoboken terminal of the original line of location the North River Bridge Company built a piece of anchorage at the intersection of Garden and Twelfth streets, Hoboken. Part of this land the company had condemned and subsequently purchased; it is understood that the land for this anchorage has since been sold by the corporation.

No application for a relocation of the line of the bridge, pursuant to the authority of the act of Congress of March 2d, 1907, *supra,* has, as yet, been made, but it is understood that the purpose of the North River Bridge Company is to relocate its line for the bridge in the neighborhood of Forty-seventh street, New York City.

It is clear that the North River Bridge Company has abandoned its originally proposed location for a bridge from West Twenty-third street, New York City, to Hoboken, New Jersey, and has not submitted to the War Department its plans for a new location.

THE NEW JERSEY AND NEW YORK BRIDGE COMPANY.

The New Jersey and New York Bridge Company was incorporated by Chapter 388, Laws of 1868, page 876, approved April 9th, 1868, to construct a bridge from Bergen county, New Jersey, to some suitable point on the opposite shore.

Section 25 of said act provided "that if the bridge or any railway, boulevard, roadway or other communication hereby authorized, shall not be commenced within five years and completed within ten years from the approval of this act, then this act shall become void as to such much of said bridge or any railway, roadway or communication, as shall not be then completed and in use, * * *; *provided,* that the said term of five or ten years shall not commence to run until a legal assent from the proper authorities in and for the State of New York shall be obtained, for the building of said bridge and carrying into effect of this act, by the company hereby incorporated, or until some company, association, person or persons duly authorized thereto by the State of New York shall enter into an agreement or contract with the company or be connected and combined or consolidated herewith and co-operate in the building of the said bridge, and in the objects and purposes of this act."

By section 26 of the organic act the Legislature reserved the right at any time to alter, amend or repeal the charter.

It is to be noted that the time for the commencement of the bridge under this act is within five years from the time "legal assent from the proper authorities in and for the State of New York shall be obtained, for the building of said bridge and carrying into effect the object of this act, by the company hereby incorporated, or until some company, association, person or persons duly authorized thereto by the State of New York shall enter into an agreement or contract with the company or be connected and combined or consolidated herewith, and co-operate in the building of the said bridge and in the objects and purposes of this act."

It does not appear that any legal assent was ever obtained from proper authorities for the State of New York, or that any company, association or persons duly authorized thereto by the State of New York ever entered into an agreement or contract with the New Jersey and New York Bridge Company, or combined or consolidated with such company for the purpose of building said bridge.

This company is not to be confused with the New York and New Jersey Bridge Company, which did enter into an agreement of consolidation with the New York and New Jersey Bridge Company of New York (*supra,* N. Y. and N. J. Bridge Company).

It does not appear that the charter of the New Jersey and New York Bridge Company was ever repealed for non-payment of taxes, nor have we been able to find any repealer tacked to some general act nor any specific repealing act.

It would seem, therefore, that the New Jersey and New York Bridge Company is possessed of a naked charter, permitting the construction of a bridge across the Hudson river, "to commence at some point on the Palisades at or near Fort Lee, in the State of New Jersey, and to cross said river at or near Fort Washington, or Washington Heights, so-called, in the State of New York, or any more suitable point on said Palisades, in the county of Bergen, in the State of New Jersey, to some suitable point on the opposite shore in the State of New York," and the time limit for the commencement of such bridge to take effect when "legal assent from the proper authorities in and for the State of New York shall be obtained, for the building of said bridge and carrying into effect the object of this act, by the company hereby incorporated, or until some company, association, person or persons duly authorized thereto by the State of New York, shall enter into an agreement or contract with the company or be connected and combined or consolidated herewith, and co-operate in the building of the said bridge and in the objects and purposes of this act."

So far as appears this company has never done anything under its charter. For the years 1893, 1894 and 1895, it filed the usual annual reports of officers and directors, other than which the records of the Secretary of State's office show nothing.

Mr. Edge moved that the Governor's message be received, spread in full upon the minutes, and five hundred copies be printed for the use of the members.

A message was received from the Governor by the hands of his Secretary, as follows:

To the Legislature:

Herewith is transmitted the report of the State Highway Commission, created by Chapter 33 of the Laws of 1909, approved March 30th, 1909.

The report gives an account of the work of the Commission during the past year and its recommendations as to the highways of the State and the establishment of the proposed Ocean Boulevard.

Probably no subject that will come before the Legislature is of more importance to the State and its future growth and prosperity than the recommendations contained in the report of this Commission. The greatness of the State and its future development are largely dependent upon its system of highways. Good highways mean quick and easy transportation from suburban localities to the centers of population, thus assuring a ready and accessible market to the agriculturist, horticulturist and the truck farmer.

Everything should be done to advance the interests of this class of our people. Then, besides this, these roads will bring to the State a large number of persons on tours of pleasure or business, distributing through all sections of the State large sums of money, thus promoting general prosperity.

The connection of all the county seats of the State by a system of highways of the kind suggested in the report herewith transmitted will unify all sections of New Jersey in a way that nothing else can possibly do.

The automobile is here, and it is here to stay. The revenue to be derived from it should be utilized to the best possible advantage for all our people. The owner of a machine never objects to reasonable fees, if he has good roads as the result of the State's exactions. The revenue derived from automobile fees the past year amounted to $245,000. This will be constantly increasing, and it is probable that next year not less than $300,000 will be paid into the treasury of the State from this source. If the fees are increased, as the Highway Commission suggests, at least one-third additional revenue will be received.

Good roads save in the operation of a machine, in tires alone, many times the cost of the license fees now exacted in this State. The automobilist is entirely willing to pay large license fees if he is assured that whatever revenue is derived from this source will be used exclusively for the improvement of the highways.

An attractive system of roads, such as is recommended in the report of the Highway Commission, coupled with the proposed ocean boulevard, will bring to this State a greater number of machines from the neighboring cities lying on either side of us than ever before, and will thereby assure a greater increase in revenue, even at the present fees, than we can now estimate with any certainty.

All who are proud of our State and desirous of seeing its rapid growth of the past few years accelerated will appreciate the importance of the suggestions contained in the report of the Commission, and will be glad to co-operate with and facilitate all future efforts to increase the number of our improved roads.

Legislation looking to the end suggested by the Highway Commission is most earnestly recommended. The State cannot expend any money to greater advantage than in the manner suggested by the Commission's report.

By improving our highways we shall not only make our State a delightful place in which to live, but a most attractive one to travel through or visit.

Besides all this, by taking over these highways and relieving the localities from taxation for their maintenance we shall assume a just burden without increasing the present expenditure by the State for public highways, and thus enable the localities to construct other roads, with the assistance of State aid, out of the appropriations which may be hereafter made in the annual appropriation bill.

This whole subject is commended to the Legislature with the earnest hope that the plan suggested by the Highway Commission may receive its approval and that this system of roads as projected may soon become an accomplished fact.

Respectfully submitted,

JOHN FRANKLIN FORT,
Governor.

EXECUTIVE DEPARTMENT,
STATE OF NEW JERSEY,
February 23, 1910.

REPORT OF THE STATE HIGHWAY COMMISSION, CREATED PURSUANT TO CHAPTER 33 OF THE LAWS OF 1909.

To the Legislature:

By Chapter 33 of the Laws of 1909, the undersigned were created a commission to be known as the State Highway Commission.

An organization of the Commission was effected by the selection of the Governor as Chairman, and the duties enjoined by the statute entered upon by the Commission.

Our first act was to hold a conference between the Commission and the representatives of various boards of chosen freeholders of the several counties of the State at Sea Girt, last summer, and a general discussion of the whole subject of State Highways considered.

Other meetings have been held by the Commission to formulate plans that we might reach a satisfactory result, with a view of reporting some practical suggestion to the Legislature for its action.

After a most careful consideration of the whole subject, and full inquiry into the cost of maintenance of existing county and State roads, we have reached this result:

We recommend that a statute be passed authorizing this Commission to negotiate with the respective boards of chosen freeholders and municipal boards, if necessary, for the ceding to the State of the right to maintain a system of highways through the respective counties and municipalities of the State, which in the judgment of the Highway Commissioners are essential to the establishment of a system of highways which will connect the several county seats of the respective counties with each other; and with the roads bordering on the Atlantic Ocean which connect with and link into said system.

New Jersey has splendid roads. The great problem as to them is their future maintenance in a high state of perfection. The expense to the counties of maintaining their highways constructed by State aid or otherwise is, at the present time, large, and is sure to be heavy in the future. If this burthen could, in part, be lifted from the counties and taken over by the State, it would give great relief. Beside this, it would assure a system of highways throughout the State of about eight hundred and fifty miles in length that would be kept in a uniformly good condition.

We believe this method would be preferable to having the Road Department of the State, as at present, aid in the maintenance of a section here and a section there throughout the State, without any uniformity or the connection of one section with another.

It would also assure equal aid to all counties rather than the uncertain expenditure in certain counties as distinguished from others under the present system.

And, besides all these advantages, it would guarantee throughout the whole State a connecting system of good roads to every chief point in the State.

A map, prepared by the State Road Engineer, accompanies this report and shows in red lines the route of the proposed connecting highways, and points out, by the variance in the marking, those upon the proposed route which are already constructed and those needing construction.

Of the entire eight hundred and fifty miles, there are only two hundred and ten miles that have not been improved at this date. The sections yet remaining to be improved in any county should be so improved under the existing State aid laws and then taken over with other roads in the system. As the roads in the proposed route yet to be improved by the counties with State aid will be new, when taken over, and will need no repair, it is suggested that provision be made for the State in these cases to bear fifty per centum of their cost.

It is difficult to estimate the great advantage that this system of highways would be to the State. It would exceed in length and equal in interest the good roads tour to the White Mountains, and its attractiveness and diversity of scenic interest would compare favorably with it. The revenues it would bring to our people would be very large. It would increase values and greatly benefit the agricultural interests of the State. It would mean

much for New Jersey to possess the best uniform system of highways in this country.

The estimated annual cost of maintaining these highways, after they are once put in order, as made by the State Road Department, is $221,000 per year. To complete these highways which are within the system as suggested by the Commission, and to put them into good condition, would cost about $1,000,000. The repair of the whole system need not be done in any one year, but several years could be occupied in the completion of the improvement of the system as herein suggested.

It would take some time to secure the consent of the boards of chosen freeholders and the several local municipalities to the transfer of the roads to the State, as here suggested, and no large annual appropriation need be made in excess of that usually made for annual road construction and maintenance.

Under the laws passed in 1909, the expenditure of the moneys derived from the automobile fees is placed in the hands of the Road Commissioner. If these fees are set apart for the maintenance of this system of highways, the amount thus received would be abundant to put the scheme into operation and begin the repair of the proposed State County Seat Highways as rapidly as the roads can be turned over to the State for that purpose. In the judgment of the Highway Commission, the automobile license fees should be increased. No license fee for any machine should be less than five dollars and the rates on all others should be increased at least one-third over those now charged.

In the proposed plan here suggested, the Commission have had in view three things:

1. The increased reputation of the public highways in this State.

2. The relief of the localities from the cost of the maintenance of the roads taken over from this time on.

3. The establishment within the State of New Jersey of the finest system of roads to be found anywhere in this country.

The ocean highway project, which is to link in and be connected with the State system of highways, will result in an advantage which is greater than it is possible for us now to estimate or predict. Our already famous sea coast is the admiration of all our people, and everything should be done to make it attractive and increase the prosperity of the shore line of the State.

The Commission will have drafted by the Attorney-General a bill to meet the suggestions herein made, which will, in due time, be presented to the Legislature for its action.

Respectfully submitted,
JOHN FRANKLIN FORT,
JOS. S. FRELINGHUYSEN,
JOHN D. PRINCE,
FREDERICK GILKYSON,
State Highway Commission.

A message was received from the Governor by the hands of Secretary, and was read as follows:

March 9th, 191

To the Legislature:

Herewith I transmit the "Progress Report" submitted by Board of Appraisers of the Railroads and Canals of the St appointed under Joint Resolution No. 3, entitled "Joint Res tion concerning an inventory and appraisal of railroad and c property, including franchises, in the State of New Jers approved April 5th, 1909.

By the terms of this Resolution, the Governor was authori to appoint three competent persons, two of whom should be perts, who should "proceed forthwith to make a revaluation all railroad and canal property in the State, real and perso including separately the franchises, and make a true and c plete inventory and appraisal of the true value thereof."

difficult to find persons who were experts answering
ption just quoted, and the compensation which they
demand made it almost impossible, under the amount
ed, to secure appraisers. After considerable effort,

one of the appraisers appointed by me, took part, cost in
State about $150,000.

In beginning the work, it was determined to take up
single system and look into it as far as the appraisers would
time under the resolution to do so. This was done, an
Pennsylvania main line system between the Delaware rive
the Jersey City Terminal was decided upon. All of this
was not and could not be completed within the time specifi
the Resolution.

The appraisers state in their report, in relation to the
done: "We have, however, been able to complete the valu
of graduation and masonry, bridges, track and appurten

and in Mercer county, and of the signalling apparatus in J
City. Statistics have also been collected and careful study

In addition to the above, a considerable amount of data
incidentally collected relating to the other parts of the road
to the other railroads of the State which will be valuable fo
in case the work should proceed."

The appraisers, in their "Progress Report" herewith
warded, have gone but little, if any, into figures, for the re
as they state it, that "it is unwise to consider the apprais
final until the entire inventory is complete;" and they say
that "we think it would be unwise from every point of vie
make public any definite figures. Any final valuation of the
road property of the State should obviously be made in the
of a full understanding and consideration of that property,
only in detail, but as a whole. Furthermore, it might be

air to publish the results relating to a single road until al of all can be submitted."

so much a question as to whether the values will be r diminished by a re-appraisal of the railway property there should be a complete and thorough re-appraisal

d in my Inaugural address: "If the property of the mpanies is taxed in excess of what it should be, it is should be righted. If it is not so taxed, the people to know the facts. Nothing is wanted but that which right."

nitude of the work called for by the Joint Resolution h, 1909, was probably not fully appreciated either by ture or the Governor; and it is quite evident from the e Resolution that the time within which it was possible work was greatly under-estimated.

nsin and Michigan it required eighteen months to do nd a similar work on the New York Central railroad e occupied about two years. Owing to the large terties in this State the work required here will exceed ost any State in the Union. But neither time nor cost considered in this matter if we can secure a fair and valuation of the railway property in the State upon f its true value.

raisers are men who know how to proceed to make the nd are thoroughly competent to find the property and at its true value. They are all experts in the respecn which they are working, under the division of the they have made, as appears by their report.

t is desired from this investigation but such as is just Justice to the people and to the railroads will not be any cost.

npensation which the appraisers were receiving was month. This seems to be large and it is large, but men for this work cannot be obtained except at a

sible that the Joint Resolution might have organized nt with a single head, under which all the work could have been done and thus having but one high-priced ex official, but the Legislature saw fit to require of the Gove that at least two of the appraisers should be experts, and necessitated large salaries and heavy expenses for the apprai

Some suggestion has been made during the past few mo that the appointment of these appraisers in this way was a flection upon the State Board of Assessors. It is quite appa that the Legislature did not intend any such reflection. Executive may say this with consistency, because the crea of the Board of Appraisers was a legislative act; and it is q evident that the Legislature had no such purpose in mind, such a thought never entered into the mind of the Executiv to reflect upon the State Board of Assessors.

The State Board of Assessors is composed of business rather than experts, and they must of necessity rely upon ex information as to values, or upon the returns made by the roads themselves.

To make an appraisement of the character required by Resolution of April 5th, 1909, involves the constant atten and all the time of those engaged in the work. This canno expected of the State Board of Assessors at their present sal and it is questionable if any of them would consider themse competent to make the appraisal of railroad property in a su ently intelligent way, without the assistance of expert engin or other appraisers.

The object of appointing the appraisers, undoubtedly, wa assist the State Board of Assessors and furnish them data f basis of the assessment of the railway property of the State, in this light there cannot be any implication from this legisla action of an intent to reflect in any way upon the State Boar Assessors or their work in the past.

While I have stated in this message the Board of Apprai whose report is herewith transmitted, have not given any fig in their "Progress Report," I have nevertheless in my posses a personal report made to me by the appraisers of the re which they have secured, in so far as they have been fully t lated; and while the appraisers have expressed to me, in tr mitting this personal report, the view that, in their judgmen be made public prior to the completion of their work, le to agree with that suggestion, and feel it to be my nd this personal report, together with the "Progress erewith transmitted.

cial report, to which I am now referring, relates to districts in which the appraisers have been operating, comparison between the values ascertained by the and the value at which second class property was 908 in such districts. It also gives a summary of the nd appraisal of the tangible personal property, and a on of the appraisal of the floating equipment of the ia Railroad, with a comparison of the valuation of roperty by the railroad itself; and it will be noted that e in the floating equipment of one railroad alone at tax rate of $1.80 will produce sufficient additional the State in any single year to cover twice the amount, re, of the cost already incurred by the appraisers nder the Joint Resolution of April 5th, 1909.

nitting this report, the whole matter is submitted to ture for such action as in its wisdom seems proper. want this work done and desire that it shall be done without political considerations entering into it. The doing it is for the Legislature to determine; but I am onvinced of the fact that this appraisal should be made hen I originally recommended it.

Respectfully submitted,

To Honorable John Franklin Fort, Governor, State of N
Jersey, Trenton, New Jersey:

SIR—The Board appointed by you on the fifth day of M
1909, in pursuance of the provisions of a Joint Resolution of
Senate and General Assembly, approved on the 5th day of Ap
1909, to make a revaluation of all the railroad and canal pr
erty of the State, now submits the following progress report:

A very brief consideration of the subject, and a hasty exa
ination of the data available, made it obvious to the Board t
it would be impossible to accomplish the work specified by
Joint Resolution either within the time stipulated therein or w
the amount of money appropriated therefor.

At a conference held on May 14th a communication
submitted to you reciting the conditions we found to exist
the character and value of the data available in possession
other State Departments, and suggesting two general plans
programs that appeared to be open for the prosecution of
work.

One of these involved the assumption that the data in
possession of the officers of the State Board of Assessors
other State Departments was sufficiently complete and accur
to be used as the basis of our valuation. We stated that a fa
careful examination of the schedules and records of the St
Board of Assessors convinced us that while that Board had ma
considering the means at its disposal, great progress in the

riginal data, this data was not complete or satisfac ıy cases, for the reason that where such data had not ed by the Board itself, it was forced to rely upon made to it by the railroad companies, and while these e doubtless submitted in good faith, it is questionable railroads themselves possess full and reliable inveneir property. The State Railroad Commission, also, ntories of railroad property except the reports made railroads. We stated that in our judgment such a omplete inventory and appraisal of the true value" oad and canal property of the State as is called for t Resolution could not be made from the data availices of the State Board of Assessors, the State mmission, or other State officers.

nate program involved the making up of substannd complete inventories and valuations from orig-, inventories and examinations of the property itself. ted out that only in this way would an appraisal it would be of such present and future value as to ommand the confidence of all concerned. Any other ppraisal would be of questionable fairness or utility, not be worthy of acceptance as a basis for the conement of questions at issue between the State and the

ull discussion and consideration of the matter with ecided to proceed to organize and carry out the work e with the alternate program, with the understand- Legislature would be asked to extend the time, and the additional money needed. It was determined rk should, for the present, be directed mainly to one s of railroad, so that some results might be availlging of the advisability of providing further time o continue and complete the work.

The task of making a "true and complete inventory a
appraisal of the true value" of the railroad and canal proper
including separately the franchises, of a State like New Jer
is one of great magnitude and difficulty. It involves the stu
of a large number of important railroads, the inventorying
all the property belonging to them, and the appraisement of
fair and just value, which, according to the report of the St
Board of Assessors, amounts to nearly three hundred milli
of dollars, subdivided into four classes and among 117 railro
and about five hundred taxing districts. The preliminary w
necessary before any tangible results can be reached is in
self very extensive, complicated and important. General con
tions must be studied and controlling principles worked out
adopted. The Joint Resolution stipulates that the valuat
"shall be in form available for the purpose of taxation un
existing laws," and these laws must therefore be studied
complied with in so far, at least, as they relate to the classifi
tion of property, and the principles and scope of the appra
ment.

It is not positively stated in the Joint Resolution that the v
ation is to be solely for taxation purposes. A true and comp
inventory and appraisal of value seems to be called for rega
less of the purpose for which the valuation is made. But
term "True Value" is not definitive, since the value of any pr
erty varies with the standard of value applied and the point
view from which it is judged. From the very nature of railr
property and the manner in which it is held its market va
in the sense in which that term is applied to other property
difficult to determine. The commercial value of a railroa
usually determined by its net earnings and the returns mad
its owners, quite independent of its cost or of the value of
property it possesses. Frequently there appears to be no c

ir and just any valuation of railroad properties, nded for taxation purposes or not, should obviously on broad lines applicable to all, and in order that e done it was necessary that a comprehensive pre- dy of railroad property in the State should be made ctual work of valuation was begun. This involved tion by the Board of controlling general principles, aration of a complete code of rules and instructions ance of the Board's assistants in making inventories property. It was also necessary to devise and pre- ete set of blank forms for use in scheduling and valu- , and to formulate a comprehensive and efficient sys- and accounting, adapted to the needs of a work of ude.

udy of the situation it was found that the Act, . Act of 1888, did not appear to be clear and definite ber of questions relating to the classification of rail- y. Since the taxes from certain classes of this prop- d by the State Treasury for the use of the State while those from other classes are either collected the local taxing districts or returned by the State these districts, and since our valuation must be "in le for use for the purposes of taxation under exist- t was recognized that the Board must have a clear understanding of the terms of these laws in order that the p erty appraised might be properly classified. Appeal was th fore made to the Attorney-General of the State for his opi upon many points of the law which were not clear to the Bo It appears that upon a number of these points the courts of State have not been called upon for decisions, and that others existing opinions seem to conflict. Our questions th fore required careful study and examination before they c be answered.

It was also desirable, and in some matters necessary, that road officials should be communicated with to obtain informa essential to our work, and full replies to our requests often quired investigation on the part of these railroad officials.

This preliminary work occupied much time, and the orgar tion of field forces for the collection of data on the ground thus delayed.

In the organization of the field and office force the Board to keep in mind the small appropriation available and the lin amount of work that could be accomplished, and to endeavo secure its assistants at low rates of compensation. This and additional fact that employment could be assured for a short only, made it difficult to secure men properly qualified for work. All these things combined to materially delay the be ning of the actual work of inventorying.

The preliminary work it was thus necessary for the Boar do before the actual inventory was begun, and the limited f employed thereafter, have combined to limit the quantity work that could be completed up to this time. Furtherm the exhaustion of the appropriation and the consequent neces of dispensing with assistants and employes has left on our ha a large quantity of uncompiled inventory work not available a report at this time.

Your Board does not consider it to be necessary, prope possible at this time to discuss the multifarious problems att ant upon any theory of valuation, for the reason that final clusions should not be made until more complete informa relating to the railroad and canal property of the State has collected and considered.

, after careful consideration, adopted the method of *roduction modified by depreciation,* as the basis of al of all property except land. There seems to be no all things considered, this method comes nearer to the true and rational value of the physical property than any other, though it is not ideal. This method is particularly applicable to appraisals made for the taxation under the existing laws of the State.

These broad divisions may be subdivided into a multitude
items, each of which must be considered in its proper relat
in arriving at the aggregate cost of constructing or reconstr
ing any railroad.

The work of surveying, inventorying and computing the va
of all the railroad and canal properties of the State is a w
of such magnitude and importance as to require a large and w
organized force of skilled and competent men, trained in
special work called for in each of the various broad divisions.

it is probable that the appraisal will become the basis of ass
ment for a considerable period of years.

It is important that such a work should be planned and car
out continuously and as a whole, and this implies that a suffic
appropriation should be available, so that interruptions or
pensions can be avoided.

Competent assistants can seldom be secured for short and
certain periods of time. Both economy and efficiency req
that whatever work is to be done should be mapped out

ting the cost of reproduction it becomes necessary on unit prices, and this is a very important part of The market prices of the materials used in railroad , and the cost of labor, vary from time to time wide limits. Even within a year or two the market ch supplies may vary as much as twenty-five per ie prices assigned and used are supposed to have of permanent application and to govern a computathat may be considered as controlling for a number e determination of unit cost becomes a troublesome matter. For the purposes of our work we have to obtain and use the average prices for a period of receding the date of appraisal. In estimating cost ion there are a number of general items in addition cost of materials and labor that must be taken into n. The building of a railroad requires time, and ctive capital employed must be secured at prevailing erest. The cost of engineering and of general and es, which are necessarily a part of the total cost of ist also be considered.

The application of proper rates of depreciation to the vari classes of railroad property presents many difficulties and quires careful consideration. Age, wear and natural decay not the only causes of depreciation. Even where these eleme have very little effect, depreciation may be very great because the fact that in the rapid advance of improved methods and invention of new devices a machine or article that is nearly good as new may be practically valueless because some bet article or device can be profitably substituted for it, or beca new conditions make it no longer suitable for its purpose. Th steel railroad bridges seldom, if ever, are discarded because t are worn out, but the rapid and often unforseen increase in weight of locomotives and other rolling stock makes it necess to remove them while still comparatively new in order that str tures of the requisite strength may be substituted. Again, the ch acter and volume of service over a railroad must be taken into c sideration, since the track material will not endure so long o road doing a very heavy business as on one doing a light bu ness, and therefore the rate of depreciation must be conside and fixed with judgment and care in each particular case. Wh machinery and other equipment may be kept in good repair a efficient working condition there will still be an intangible preciation, for a point will some time be reached when the c of maintenance makes it more profitable to buy a new outfit. is obvious, therefore, that no set of rigid rules for depreciati can be applied to all kinds of property; each class, and often ea individual item, must be considered with reference to the p ticular conditions affecting its life and usefulness. While full discussion of this subject is attempted at this time, so of the principles involved and the difficulties of their applicati to certain classes of property are outlined and illustrated in attached memorandum, Appendix I, dealing with the value floating equipment.

The determination of the value of the land owned and u by the railroads and canals presents many difficult and com cated problems. When originally acquired by the corporati they were often compelled to pay prices having little refere to the value of adjoining property. A railway company m e right of eminent domain to secure the land it needs it-of-way and other purposes, but in such cases it has the determination of the compensation to the owner. ary conditions of bargain and sale are absent. Railroad lands are usually permanently as there are no sales of them the usual criterion of lue is not applicable. Adventitious conditions may prices in the vicinity unreliable as evidence of the e railroad property. re but a few of the considerations that must be taken nt in attempting to place a fair and just valuation upon elonging to railroads. To reach a proper appraisal e patient collection and consideration of all the infor- tainable, and the careful weighing of all the direct stantial evidence bearing on the matter. Your Board ed a large mass of data in this department, but it is pared to name definite conclusions as to values.

e thus outlined briefly some of the conditions, prob- difficulties with which your Board was confronted in he duty assigned to it, not because we desire to mag- ork, but because we think it proper that all concerned may understand the magnitude of the undertaking and the culties encountered. The work of appraising the value o railroads of a whole State has been attempted in only a cases, and, we believe, in no case upon the scale and wit thoroughness called for in the Joint Resolution under whic were appointed. It may also be said that in no other State such an appraisal has been attempted is the value of the rai property so large, or its variety and complicated charact great, or the problems to be dealt with so complex as in Jersey.

In the organization of the Board the work to be done divided into general classes, each member being made a mittee to deal with those classes of property with whic previous training and experience made him most familiar. general plan was that each member should devote his es attention to the work of collecting and digesting the dat lating to the classes of property assigned to him, the resul be submitted to the Board for its final consideration and ad cation. The work was confined chiefly to one railroad main line of the United New Jersey Railroad and Canal pany, a part of the Pennsylvania Railroad system.

A large part of the property of this railroad is concent at or near to its eastern terminals, while an important pa it is also concentrated at Trenton; our work was, therefore, b at each end of the line in New Jersey. So far as was practi the members themselves made personal notes and inventori property, but as this was impracticable upon a large scale, parties were organized to inventory and measure up the pro found. The object was to secure a complete original invento all the railroad property of every character, together with notes relating to its present use and condition. The fiel ventories have been practically completed from the Hu river to the Hackensack river, constituting the taxing di of Jersey City, and through the taxing districts of the cit Trenton, Hamilton Township, Lawrence Township and Windsor Township, embracing the whole of the main through Mercer County. The measuring and inventory o graduation and masonry, the bridges, the track and its ap he docks and piers, the floating equipment, and the and tools in shops, was completed and much other ing to various kinds of property, was collected and l, through the districts named. The inventorying g of the signal apparatus in Jersey City was com- l the railroad buildings in Mercer County were ex- d inventoried. The examination into land values in and Mercer County was carried on continuously by ttee having that work in charge. A large amount of collected, boundaries and areas verified, tax statistics and the market values of adjoining property inves- d collated. The amount of work done and of data this department is voluminous, but it has been im- ithin the time to thoroughly classify and digest it or t final conclusions as to the value of the railroad lands. he field parties had completed their work on the y were transferred to the office and began the work the information, computing the quantities, and mak- r statements and inventories of the various kinds of nd its conditions, the unit prices and the rates of n being considered and fixed by the Board. The office somewhat delayed and interfered with by the leaving f our assistants to accept better or more permanent We have, however, been able to complete the valua- aduation and masonry, bridges, track and appurte- op tools and machinery, and floating equipment in y and in Mercer County, and of the signaling appa- ersey City. Statistics have also been collected and a dy made of the rolling stock equipment of the Penn- stem in order to determine the relative value of that is State. In addition to the above a considerable data was incidentally collected relating to the other e road and to the other railroads of the State, which ilable for use in case the work should proceed.

he valuation of certain parts of the property is, as e, practically completed, your Board is of the opinion wise to consider the appraisal as final, until the entire s completed. In the present state of progress of the work, confined as it has been to parts of a single railroa think it would be unwise from every point of view to public any definite figures. Any final valuation of the ra property of the State should obviously be made in the li a full understanding and consideration of that property, no in detail, but as a whole. Furthermore it might be cons unfair to publish the results relating to a single road un appraisal of all can be submitted.

In conclusion we desire to express our appreciation and t for the counsel and support we have received at your hand for the uniform courtesy extended to this Board by the officials of the State and by the officials of the various ra companies.

Respectfully submitted,

APPENDIX I.

Floating (Marine) Equipment, Pennsylvania Railroad Com Operating in New Jersey Waters.

CHARACTER OF EQUIPMENT.

The character, designs and service of the floating equi may be classified as follows:

Barges,
Canal Boats,
Dredges,
Car and other floats,
Ferry Boats,
Lighters,
Power Launches,
Power Lighters,
Tug Boats.
Scows,
Steamboats,
Steamships,
Transfer Boats,

The kind of service is broadly expressed by the general There is, however, a considerable difference in the charact service in each of the several groups, which materially affec item of maintenance and depreciation.

TRUE VALUE.

m true value, as applied to many items and articles ge cannot, we think, be applied generally to the floatnent of a railroad company for the reason that it is or the special needs of the company operating same, nstrated by the various and different types of equipe same class found in service in and about New Jer- consequently there is no practical ground for a meetor a willing seller and a willing buyer. Neither is there e found a ground for compromise. This reasoning pply in the same degree to each of the several classes ent for the reason that the measure of obsolescence erially.

ting equipment as a whole might properly be classed terminals; it is a part of the machinery of the entire ng it directly and is necessary for the completion of iness using it indirectly. It is necessary for the full of the land or rolling equipment and the tide or pulse iency is felt throughout the land, and as the waterinals are valuable to the railroad system so is the value ting equipment where no other means is provided for he business of the railroad company from the water the opposite shore.

ating equipment is operated in the same general mand terminals: there is a broad range of service for the ges: the lighterage limits on the Jersey shore of the iver extends from Fort Lee on the north to Avenue Point on the Kill von Kull on the south, a minimum f nine miles. The railroad freight rates include the f freight to all points within these limits. It is the actice to allow a fixed rate per ton to the floating regardless of freight classifications. This allowance e not sufficient to cover operating expenses and fixed d the difference is thrown into the general terminal nder the conditions of operation, therefore, we cannot ivorce the floating equipment from the general equipment, nor does it appear reasonable to consider the va this floating equipment apart from the distinctive purpo which it was designed and is used—namely, the purposes particular railroad which operates the floating equipment i nection with its terminals.

DEPRECIATION.

There is no well defined and generally accepted meth formula for determining the depreciation of floating equi The factor of improved design or more efficient machiner not apply to river and harbor craft with the same force ocean-going vessels. It is not likely that ferryboats will ir their speed as their present speed capacity is in excess of ble use except for a brief emergency. Some of the cros boats are powered the same as the boats in 23d Street in order to go into that service should occasion arise. general dimensions of these ferryboats are practically dete and any material change in dimensions is not likely for t sons that the slips, floats, and ferry-houses are desig accommodate boats of the dimension now in use, and any m change in such dimensions would necessitate changes in th

The possible abandonment of ferry service for tunn bridges cannot be assumed at this time and, indeed, it is u that there may be an increase of revenue of ferryboa cause of increased team freight as the passenger traffic flected to the tunnels. So far then as ferry-boats are con there is no considerable depreciation chargeable to obsole The up-keep is generally good and the frequent painting hull and superstructure defends to a large degree agair wearing effect of the elements.

On account of the absolute necessity of a tight hull it m maintained in perfect condition so far as the buoyancy an essary strength is concerned, and this factor does not per neglect as in land equipment, consequently the charge for tenance largely takes the place of depreciation, and indeed, the process of maintenance or up-keep, a hull is constantly ing its members until all that remains is the design. T y the barge "Cornelia," which commenced its official chooner "Cornelia" in 1839. In 1864 it was changed nd in 1881 became a P. R. R. barge and is still in will probably continue so long as barges of its die found desirable to operate.

se of metal hulls, plates are renewed and, since the is comparatively thin, no material depreciation is d for many years, and as the plates are renewed from a considerable portion of the depreciation is wiped scrap value increased.

There is no strain due of the sea. The boilers in many of the second boats an ten years and no renewals are considered, and renewal is made it is generally a superior boiler naintenance or addition.

The strain on the ever, may be greater than on ferry boats, for the regular steam pressure is not maintained.

loats are subjected to considerable strains and the on this account, especially in the case of wood hulls, bly more than from decay. In the case of steel ever, the life is somewhat equal to the hull of steam ssels in harbor waters, and percentage of scrap value al value is much larger than in any other form of

ts of the Pennsylvania Railroad Company for 1906, 08 do not show that any depreciation is made in the t of floating equipment. No doubt a considerable sum is charged each year to operation under the title of de tion, in order to provide a fund to keep the equipment up On the other hand, the asset account is not credited wi equipment, and it seems to be the theory that the up-kee care of the depreciation, and therefore no change is made asset account so far as the published statement is concern

The book accounts of the custodian of the property vari the annual statement, and in fact the estimated presen furnished this Committee by the P. R. R. Co. is consi higher than is shown in the last annual statement.

The practice of maintaining a constant asset value for t poses of the annual financial statement for the informa the security holders is, perhaps, entirely proper and to be mended, as it insures a conservative estimate of the naked behind the securities, provided always that maintenance up to or in advance of depreciation.

The tangible depreciation can be maintained. There i ever, an intangible depreciation which cannot be maintain in the survey of each vessel this must be considered.

The City of New York operates ferry boats of similar and in similar service. These boats are not maintained w same degree of care as the equipment under consideration question of depreciation on this municipal equipment ha the subject of much debate, and the so-called Prentice b offered calling for an arbitrary annual depreciation. A ferryboat thirty years old, costing originally $200,00 have required the expenditure of $150,000, plus interest c inal cost and the annual upkeep, the total sum of whi equal the original cost.

The "Mary Powell," built in 1861, is well known to t on the Hudson River, and though forty-eight years old, i day considered one of the speediest and best boats on th Thousands of dollars have been spent in upkeep, and this held by the owners to be in the class of up-to-date boats, the "Hendrick Hudson" and the "Robert Fulton."

Depreciation for the purpose of establishing present ment value should not be confused with cost of maintena is, of course, necessary to provide a fund for maintenan this may be provided either by charging an item to estima quirements for upkeep and additions, or by a depreciation to operating expenses available for upkeep, renewals, o tions. Every ferryboat, tug, lighter or other equipment a metal hull, machinery or other metal members, has a scra which is practically constant so far as it is reasonable to c such items in any broad plan for depreciation against tangible loss in value. This scrap value should be deducte the naked replacement value before any depreciation is d from the asset value, since the asset value never falls be scrap value.

DOMICILE AND SITUS OF FLOATING EQUIPMENT.

The floating equipment of the Pennsylvania Railroa pany operates generally within the lighterage limits bou the north by Fort Lee and 135th Street Piers, on the River, and 155th Street Pier, on the Harlem River, and south by Avenue C, Bergen Point and Owl Head, Ri avenue, Borough of Kings. The decisions of the Federal Courts seem to determine t domicile of the owner is the situs of the vessel for the of taxation, wholly irrespective of the place of enrollmen

Attention is again directed to the enrollment of the f equipment of the Pennsylvania Railroad Company partly City of New York, and partly in Perth Amboy, and fur the fact that a considerable portion, in value, of the equ is NOT ENTERED, ENROLLED OR DOCUMENTED in any distr

The broad use and purpose of the floating equipment affected by the district in which it is documented, or w it is documented at all, or whether the managing owner in the State of New York or in Hudson or Bergen Countie Jersey.

The following citations are given for the general infor of the Board:

Ayer and Lord Tie Company v. *Commonwealth of Ke*

Error to the Court of Appeals for the State of Kentuc

United States Supreme Court No. 268—Argued Apr 1906—Decided May 21st, 1906.

> "The general rule as to vessels plying betw ports of different states and engaged in the co trade, is that the domicile of the owner is the the vessel for the purpose of taxation, whol spective of the place of enrollment, subject to

ion that where a vessel engaged in interstate comce has acquired an actual situs in a state other than which is the domicile of the owner, it may there axed because within the jurisdiction of the taxing iorities."

Vessels owned by a corporation domiciled in Illinois, which although enrolled at a Kentucky port, are engaged in commerce wholly in the State, but are aged in interstate commerce and which have aced a permanent situs for taxation, and are taxed another State, are not subjected to taxation by the e of Kentucky, nor is their situs for taxation theren account of their being enrolled at a port of that e."

But if enrollment at that place was within the utes, it is wholly immaterial, since the previous sions to which we have referred decisively establish ENROLLMENT IS IRRELEVANT to the question of ation, because the power of taxing vessels depends er upon the actual domicile of the owner, or the nanent situs of the property within the taxing jurision.

ke Erie Transportation Company, Circuit Court of h Circuit, 1901, *112 Fed. 746.*

. "Taxation—Jurisdiction of State. Situs of peral property.

To enable a State to impose a valid tax upon peral property it must have jurisdiction over the owner, he property must have acquired a situs therein, septe from the owner's domicile, for the purpose of taxn."

The distinction between the nature of vessel prop- engaged in the navigation of the sea or intere waters, and the movable property of a railroad pany employed in interstate commerce, was pointout by Mr. Justice Gray in *Pullman's Palace Car Co. Pennsylvania, 141 U. S. 18, 23, 11, Sup. Ct. 876, , 35 1 Ed. 613, 616,* where the justice said:

> "Ships or vessels, indeed, engaged in inter foreign commerce upon the high seas, or other which are a common highway, and having thei port, at which they are registered under the law United States, at the domicile of the owner in State, are not subject to taxation in another S whose ports they incidentally and temporaril for the purposes of delivering or receiving pas or freight. But that is because they are not, proper sense, abiding within its limits, and h continuous presence or actual situs within its j tion and therefore can be taxed only at the situs."
>
> "The New York Court of Appeals in *People* *missioners of Taxes and Assessments for Ci County of New York, 58 N. Y. 242, 246,* in dis the uncertainty of taxing situs of vessels eng interstate or foreign commerce, if the situs f the registration was to be disregarded, said:
>
> "To determine the situs, for the purposes c tion, by their longer or shorter stay in a particu or by their more or less frequent resort to it, w troduce perpetual uncertainty which would pr subject them to taxation in every port or exem in all. We are of the opinion that the rule ado the case of the United States Courts and follo the judgment appealed from, is the better rule in accordance with the statutes regarding tax this State."

The equipment of the Pennsylvania Railroad Compan consideration is enrolled by Lewis Neilson, Secretary Pennsylvania Railroad Company, with offices in Phila It would appear, therefore, that the Pennsylvania Railroa pany have declared the domicile of this equipment to be to the district of the City of New York, and since this includes Hudson County and part of Bergen County, N sey, the term "Port of New York" includes the vari minals of the Pennsylvania Railroad Company on the ere the equipment is operated from and where it is

ennsylvania Railroad Company holds that the domicile er of this equipment was at Philadelphia or in any part vania, they could not have enrolled it in "the district of New York."

etermine, then, that the domicile of the equipment un- eration is in New Jersey or any part of it, or in "the the City of New York," we suggest consideration of n of Chief Justice Beasley, *Central Railroad Company oard of Assessors, 49 N. J. L. (20 Vroom) I.*

ef Justice cites the *Pullman's Palace Car Co.* v. *Penn- 41 U. S. 18.* In that case the opinion was delivered stice Gray, from which we quote as follows:

> "Ships or vessels, indeed, engaged in interstate or foreign commerce upon the high seas or other waters which are a common highway, and having their home port, at which they are registered under the laws of the United States at the domicile of their owners in one State, are not subject to taxation in another State at whose ports they incidentally and temporarily touch for the purpose of delivering or receiving passengers or freight. But that is because they are not in any proper sense abiding within the limits, and have no continuous presence or actual situs within its jurisdiction, and therefore can be taxed only at their legal situs, their home port and domicile of their owners."

APPLICATION OF THE LAW.

ommittee does not attempt to interpret the laws of this ference to the assessment of floating equipment owned ds operating in this State, except to determine, if pos- scope of our survey, so as to prepare our inventory isal in accordance with our instructions set forth in Resolution No. 3" "in form available for use for the taxation under existing laws."

Your Committee has proceeded with its survey on the tion that it was its duty to survey all of the floating eq of the Pennsylvania Railroad operating in connectio owned, leased or operated railways of that Company in th It is manifestly important therefore that we have def structions to guide us in our survey of the floating eq of other railroads operating in New Jersey waters, so may direct our work to cover the information necessar tain as well as to avoid surveys not properly within t of work delegated to your Board.

Under direction of your Board this Committee add letter of inquiry to the Hon. Attorney-General of thi on August 23d, 1909. A copy of this letter, with copy dated September 7th, accompanies this report without co

Section 6 of Chapter 208 of the Laws of 1888 read lows:

> *And be it enacted,* That if the property of road or canal company be leased to or operate other corporation, foreign or domestic, the or the lessor, or company whose property is shall be subject to taxation in the manner here directed, and if the lessee or operating comp ing a foreign corporation, be the owner or of any property in this State other than which i from the lessor or company whose property is it shall be assessed in respect of such propert manner as any domestic railroad or canal c any tangible personal property of such forei pany, if used or kept but a part of the time State, will be assessed such proportionate pa value as the time it is used or kept in this Stat the calendar year preceding bears to the whole

Whether or not this section 6 is intended to cover equipment as a whole or in part cannot properly be by this Committee.

If we are instructed that the floating equipment doc in the Port of New York should not be considered in vey, then there will be comparatively little of the floatin consider, since all of the ferryboats, thirteen in y-one (21) tug boats, and two hundred and forty-barges are enrolled in the Port of New York. he car floats, seventy-seven (77) in number, all nine (29) in number, and two (2) dredge boats ENTED in any port.

nstructed further that we are to survey only the nent used entirely in interstate business, and that ng equipment will be considered, then we will find ned to the two dredges and a few flat scows used the D. & R. Canal.

CONCLUSIONS.

htful consideration of all the conditions attendant mination of the true value of the floating equip-ennsylvania Railroad, we have concluded that we e use and occupancy value, and the bargain and r we cannot segregate this equipment from the ry of the railroad system and consider what effect n of such equipment would have upon the railroad arious interests it serves. The traveller and ship-erved by that railroad which delivers him or his promptly and quickly to his destination. Conse-st consider that for the purposes of carrying pas-reight every part of a railroad is of equal value, rt is necessary to the continuity of service which oken line for his conveyance from start to finish.

two or more ferryboats, tugs or other important ment were suddenly destroyed and the loss was riously cripple the service, it is likely the railroad ly pay a premium, if by so doing the equipment nptly replaced. This use and occupancy value nk, be considered and appraised, but should not be our determination of true value aside from the e have endeavored to determine the cost of pro-ch of the various kinds and types of equipment figures before us we have applied a certain depre-lieve that the system used gives the "true value," or naked value aside from the franchise value, and we fully submit the results of our work which has extend period of four months.

A message was received from the Governor, by the hands Mr. Fort, his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 14th, 1910.

To the House of Assembly:

I herewith return to the House of Assembly, in which originated, Assembly Bill No. 58, entitled "A supplement to an entitled 'An act providing for divorces and for decrees of nul of marriage, and for alimony and the maintenance of childre (Revision of 1907), approved May seventeenth, one thous nine hundred and seven.

This bill relates to the signing of decrees nisi in ex parte s for divorce. The bill provides that decrees nisi may be signe once on the filing of the master's report. The decree nisi divorce proceedings in this State was introduced by Chapter of the Laws of 1907. This is the so-called uniform divorce and was drafted by a commission of experts called by Gover Pennypacker, and held in the city of Washington in 19 Among those on that commission, as the representative of State, was Vice-Chancellor John R. Emery.

This general divorce act is now in force in several States, it should not be amended unless for very satisfactory reaso However, as will be seen by the letter of the Chancellor of State annexed to this Message, there is no longer any need the act which is herewith returned.

Every protection should be thrown around the divorce law prevent imposition upon them and fraud in the obtaining divorces by collusion or otherwise. There should be no ra road to obtain divorces. The more they can be delayed and more thoroughly they can be investigated and the testim sifted and the motives actuating the parties considered, the be it will be for the community.

By the 20th and 21st sections of Chapter 216 of the Laws 1907 (the uniform divorce act), six months is required to ela after the decree nisi before the final decree of divorce can granted. Prior to the enactment of this statute, the Court Chancery had a rule known as Chancery Rule 165 which p hibited the signing of any decree of divorce until after the m ter's report had been on file for thirty days. Of course, t rule has been superseded by the present statute.

present Chancellor, on the first of February last, formally d the 165th rule and struck out the thirty days and sub- therefor eight days as the time within which decrees nisi be signed after the filing of the master's report; so that der the statute a decree nisi may be signed any time after g of the master's report, and must be within eight days. e is, therefore, no further reason for this statute being en- and the Court of Chancery should not be hampered by y provisions, where rules will accomplish the purpose. uested from the Chancellor that he give me his views with to this proposed statute, and he complied with my request r, a copy of which is hereto annexed, in which he clearly that there is no necessity for the enactment of this bill, t it would be unwise legislation in the view of the Court. these reasons, the proposed statute is herewith returned my approval.

Respectfully submitted,
JOHN FRANKLIN FORT,
Governor.

COURT OF CHANCERY OF NEW JERSEY,
CHANCELLOR'S CHAMBERS,
MORRISTOWN, N. J., March 12th, 1910.

ble John Franklin Fort, Governor:

SIR—My attention is called to Assembly Bill No. 58, a ent to the Divorce Act of 1907, which provides that "A isi in ex parte suits for divorce or annulment of marriage signed and entered at once after the filing of the special s report."

bill was, no doubt, intended by the introducer to prevent sary delay in divorce cases. But the bill is not required purpose, as I shall proceed to show.

to the Divorce Act of 1907 there was no decree nisi in r divorce or annulment of marriage, but upon the court that the complainant was entitled to relief a final decree de. In ex parte cases the decree was made upon the f a special master, who took the testimony just as he now . In order to lessen the probability of a divorce being or a marriage annulled upon the report of a master that nded upon some mistake or upon perjured testimony, ncellor, nearly twenty years ago, established Rule 165, rovided that "No decree in any ex parte suit for divorce he annulment of a marriage shall be signed until after er's report shall have been on file thirty days."

The new Divorce Act, in its 20th and 21st sections, in ord to achieve the same purpose of preventing unfounded, fraud lent or collusive decrees for divorce or annulment of marriag provided that if the court decides that the plaintiff is entitled a decree there shall be first a decree nisi, which shall becor absolute at the end of six months, unless appealed from or unle the court, within the six months, for sufficient cause, otherwi orders.

Obviously, this delay of six months required by law render it unnecessary to longer enforce the provisions of Chancery Ru 165, which provided, as already mentioned, that no decree shou be signed until after the master's report should have been file thirty days. And, therefore, I long ago gave instructions the Chancery Clerk that this part of Rule 165 should be dis garded, and that ex parte divorce cases should be distribut among the judges of the court for consideration as soon as t master's report was filed, or, at least, as soon as a sufficient nu ber of cases accumulated to justify sending them to the judge.

In short, Rule 165, while remaining unaltered until recent has not been enforced with respect to this thirty-day clause fo year or more past.

And now, by rule promulgated on February 1st last (which observe was subsequent to the introduction of Assembly Bill N 58), I formally amended Rule 165 by striking out "thirty day and inserting "eight days." The period of eight days w adopted in order to give a reasonable time to correct errors omissions in the testimony taken before the master prior to sen ing the cases to the Chancellor or to a Vice-Chancellor for co sideration.

I deprecate the passage of Assembly Bill No. 58 for seve reasons.

First, because, as the practice of the court now stands, it uncalled for, there being no unnecessary delay in ex parte divo cases after the filing of the special master's report.

Secondly, because the bill would accomplish no useful purpo It provides that a decree nisi may be signed at once after t filing of the special master's report. There is nothing now prevent its being so signed at once except the rule of the co that allows an interval of eight days in the interest of orde procedure.

Thirdly, a still more important reason for my opposition to t bill is that it proposes, without sufficient ground or reason, amend the divorce law of 1907 (P. L. 1907, p. 474), which, y may recall, was enacted as the result of a convention of expe the States of the Union that was held with the object of ng a uniform law and system of procedure in divorce for all the States. Vice-Chancellor Emery represented sey in that convention or congress, and he assisted n the preparation of this law. It is highly desirable that s it stands should be as little amended as possible, and I y desire that any amendments that are contemplated e submitted to and approved by Vice-Chancellor Emery eing seriously considered. And this not only because pert in the matter, but because of the desirability of ng the effort to have our divorce law uniform with those other States as may adopt the recommendations of the ongress.

ese reasons I respectfully oppose the enactment into law ibly Bill No. 58.

Yours very truly,
(Signed) MAHLON PITNEY.

Mr. Meyer sent to the Clerk's desk the following report:

F THE JOINT COMMITTEE ON REVISION OF THE MILITARY CODE.

gislature of the State of New Jersey:

15th of April, 1909, the following concurrent resoluadopted:

ed by the House of Assembly (*the Senate concurring*). mmission be appointed for the purpose of revising the ode of the State of New Jersey. Such commission ist of two Senators (neither of whom shall be of the tical party), to be appointed by the President of the d two members of the General Assembly (neither of ll be of the same political party), to be appointed by er of the House. Such commission shall organize days after the passage of this resolution. Such comall have the power to call for all papers and records nents in the custody of the military authorities of the l may also call upon the officers of the National Guard ttorney-General for such legal advice and assistance e needed. Such commission shall at the next session gislature submit a report of its conclusions, and shall it a bill or bills for the revision of the military code te."

pliance with the above concurrent resolution, the Presie Senate appointed Senators William J. Bradley and Fielder, and the Speaker of the House appointed men Peter Vredenburgh and Charles A. Meyer to n said commission. The commission met within the l by the concurrent resolution and organized by elect-Bradley Chairman and Mr. Meyer Secretary.

mmission decided to hold its meetings at the various in the State and extended invitations, through the General and commanding officers of the regiments, ficers of the respective organizations to be present. etings were held at the armories of the First, Second, urth and Fifth Regiments, and were attended by a f the regimental officers. At these meetings the object for which the commission was appointed was stated a all officers were requested to make suggestions and recommen tions looking toward the improvement of the present Milit Code or for the good of the service. The suggestions offie at these meetings were of great value to the members of commission and after considering the same, the commiss begs to recommend the following changes to the Military C of the State:

First. The abolition of all the General Staff and Staff Cor except those provided for by the Constitution, as the act Congress, approved January 21st, 1903, does not recognize make provision for such officers. This would be in line w the U. S. Army organization and the National Guard of ot States, and would eliminate an unnecessary expense on organized militia of the State.

Second. That all duties now performed by the General St Corps be transferred to and performed by the Division St with proper clerical force, under the supervision of the Maj General commanding the National Guard, which would be compliance with General Order 12, Series 1907, S. N. J. T Adjutant-General, who is the official means of communicat between the War Department and the National Guard of t State and also the Military Adviser of the Governor, sho have sufficient assistants with the proper clerical force to k his records up-to-date. All military or naval accounts, paya by the State should be audited by the Adjutant-General.

Third. The Judge Advocate's Department should cons of one Judge Advocate General, rank Lieutenant Colonel, a two Judge Advocates, rank Major; the Judge Advocate Gene to be assigned to the Division Staff and one Judge Advocate each Brigade Staff. The U. S. Army regulations do not prov for a regimental Judge Advocate. When occasions require line officer could be assigned to such duty.

Fourth. That all Quartermaster, Commissary and Ordna property of the State and U. S. Government, necessary to f equip the National Guard of this State shall be kept in the va ous armories of the organizations and the proper officers m responsible for them.

ligibility required to receive a commission as an of- National Guard of this State should be of the high- l. No officer, except those appointed to the Judge · Medical Departments, should be commissioned, un- had previous service as an officer or enlisted man in l Guard of this or other States, the Army or Navy ted States. Tenth. There was considerable dissatisfaction expressed regard to small-arm practice, in that sufficient facilities were provided for the accommodation of men ordered to Sea for such practice; too much time is taken up by outside organ tions who are permitted to use the ranges, to the detrimen our organizations. Suggestions were made that an additi range be acquired in the northern part of the State for up-s organizations, and that more time be devoted to individual practice. The general expression of opinion was that Sea Girt a camp of instruction, has outlived its usefulness; that part sho be retained for rifle practice and that the balance should be and the money realized therefrom used for the purchase of ditional lands adjacent to that now owned by the State in northern part thereof, which is better adapter for manœuv purposes and field work, which would be more instructive the officers and enlisted men. We heartily concur in the rec mendations made by Capt. T. E. Murphy, U. S. A. (A. G. port, 1908), in this respect.

Eleventh. We would, therefore, recommend that the Le lature make some provision giving the State Military Bo the power, if in their opinion it is deemed necessary, to se and purchase additional lands in the upper part of the State manœuvring purposes and rifle practice.

The above recommendations are taken from the expressio opinion of the majority of the officers of the National Gu and a few of the officers of the regular army. We have requ ed the Attorney-General to draft amendments to the pres Military Code on these lines and will present them to the c sideration of your honorable body when completed.

In order to further show to the Legislature the necessity consideration of the recommendations of your Commission, have attached hereto a statement of the percentage of the t available organized militia as compared with the number those available for military duty but unorganized, in what r

lered the leading National Guard States, by which it
hat the highest percentage is maintained by Connecticut
lowest by the State of Washington, and that the State
Jersey stands sixth in this list, with reference to the
of men in the organized militia as compared with the
of men available for military duty. It is believed that
ther States of the Union stand below these ten in this
on.

A message was received from the Governor, by the hand Mr. Fort, his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,
March 21st, 1910.

To the General Assembly:

I herewith return to the House of Assembly, in which it inated, Assembly Bill No. 100, entitled "A supplement to ar entitled 'An act to authorize the board of chosen freeholder counties of this State to acquire lands and erect and mair hospitals for contagious diseases, and to provide for their co and management,' approved April eighth, one thousand nine dred and three," without my approval.

This bill seems to me to have in it a very objectionable prin in public affairs. It provides that where in any county in State a hospital is now or may hereafter be maintained th shall be lawful for the freeholders by a two-thirds vote to d that the entire appropriations made for the maintenance of hospital and the keeping of the building or buildings in re may be placed "solely at the disposal of the board of mana thereof," in which event it is made lawful for such boar freeholders by resolution to direct that said appropriation disbursed by the said board of managers (of the hospital checks or warrants drawn on the county collector, signed by presiding officer for the time being, and countersigned b clerk or secretary."

If any board of managers of any institution in the Stat county is to be permitted to draw drafts directly upon the trea of the State or county, without independent audit, it woul difficult to determine what the result might be. It woul contrary to all custom and in conflict with the expressed man of the statute as to State institutions, as found in Chapter 28 the Laws of 1907.

By Chapter 155 of the Laws of 1903, it is expressly prov by Section 6 as follows:

"All expenses and charges incurred in conducting and m taining any such hospital, and in keeping the said buildin buildings in repair, shall be paid by the county collector, f aised or to be raised, as far as necessary by taxation, as ounty expenses are raised and paid."

act herewith returned operates as a repealer of Section original act just quoted, insofar as it changes the method ient.

more safeguards that can be thrown around the expendi- county and State funds, the better it is for the taxpayers.

act to which this is a supplement is a general act, and is ble to all the counties of the State, and the supplement h returned would apply to any hospital of the character ied in the original act existing in any county in this State.

stion if a provision of the kind found in the act herewith d exists in any other act, or in relation to any other insti- either State or county, within our State.

y bill incurred by a county institution should, before it is e subject to disinterested audit. Most of the counties of te have a county auditor, who verifies every item of ex- re of every institution in the county, and passes upon its , and even upon the personal bills of the members of the of chosen freeholders. This is a most wise provision in nagement of State or county affairs, and it should be l to and strictly enforced.

estion if any one would wish, even in our State, with titutions managed as well as they are, that the audit of nptroller should be removed and a certificate of the officers oards of managers of our various institutions substituted disinterested audit, and the same rule applies to counties.

ving the bill to be wrong in principle, I feel compelled to ld my signature and return it to the General Assembly t my approval.

Respectfully,
JOHN FRANKLIN FORT,
Governor.

essage was received from the Governor, by the hands of ort, his Secretary, as follows:

State of New Jersey,
Executive Department,
March 21st, 1910.

To the General Assembly:

I herewith return to the House of Assembly, in which it orig
ated, Assembly Bill No. 174, entitled "A further supplement tc
act entitled 'An act concerning disorderly persons (Revision
1898),' approved June fourteenth, one thousand eight hund
and ninety-eight," without my approval.

This act makes any person who shall expectorate or spit on
floor, side, seat or platform in any trolley passenger car a
orderly person. By Chapter 21 of the Laws of this session,
proved March fourteenth, one thousand nine hundred and
persons adjudged to be disorderly persons are subject to an
prisonment for the term of one year or a fine of $175, or b
This penalty I regard as out of proportion for the offense m
by this act. Originally the penalty under this act for this kind
an offense was $25, but by various supplements it has been
creased from time to time until it is now as fixed by Chapter
of the Laws of 1910.

There is no objection to the act herewith returned on princi
It would probably be wise to provide that such persons should
disorderly persons, but I think that the act should fix the pena
as the present penalty for persons adjudged to be disorderly
too severe for the character of the offense in the act herew
returned.

Another reason, in my judgment, is that the penalty for
character of an offense should be fixed by ordinance, and if th
is not already sufficient law for that purpose, as there proba
may not be in some localities in the State, I would suggest t
an act be passed permitting common councils or other govern
bodies of municipalities to fix a penalty to be inflicted upon p
sons expectorating in trolley cars at, say, a fine of ten dollars
imprisonment for ten days, or both, in the discretion of the mag
trate before whom the conviction was had, and authorizing r
nicipalities to pass ordinances in accordance therewith, and c
ferring upon police justices or other magistrates jurisdiction
hear and try complaints for this offense.

ιowever, in the wisdom of the Legislature, it is thought to keep the punishment of this offense under the disorderly ;hould be perfectingly willing to approve the bill herewith ed, if it were re-introduced with an amendment fixing the at a fine of not exceeding ten dollars or imprisonment days, or both, in the discretion of the magistrate before conviction was had.

these reasons I return this bill without my approval, that gislature may, if it desires, enact other legislation in the re suggested.

Respectfully,

JOHN FRANKLIN FORT,

Governor.

To the General Assembly:

I herewith return to the House of Assembly, in which it or inated, Assembly Bill No. 56, entitled "An act to amend an entitled 'An act providing for the construction and maintena of public docks, wharves, piers and bulkheads by cities,' appro March seventeenth, one thousand eight hundred and ninety-nin without my approval.

The introducer of this bill, after conference with me, as its provisions, has discovered that in the official copy which presented to the Governor for his signature, it does not complish what was intended should be accomplished by act. On the other hand, in the official copy reprint the before me repeals section 2 of the act to which this act i supplement, which was not intended to be done. The error crept in in adding an amendment to the second section of bill as originally introduced, which has stricken out parts that bill which were not intended to be eliminated.

For this reason, at the request of Mr. De Unger, the int ducer, the same is herewith returned without my approval.

A message was received from the Governor, by the Mr. Fort, his Secretary, as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT, March 28,

To the General Assembly:

I herewith return to the House of Assembly, in which inated, Assembly Bill No. 266, entitled "An act to an title and body of an act entitled 'An act to enable counti have no county hospital to assist in maintaining hospital in such county,' approved April twenty-sixth, one thousa hundred and eighty-six," without my approval.

This bill I am compelled to return, because, in my ju it is unconstitutional in two respects.

First. The title of the act is "An act to amend the body of an act entitled 'An act to enable counties which county hospitals to assist in maintaining hospitals locate county,' approved April twenty-sixth, one thousand ei dred and eighty-six," and section two of that act is th which the bill herewith returned proposes to amend. An examination of the statute shows that the section here amended was amended by an act approved March twenty-third, one thousand nine hundred and nine, and hence the title of this act should have read as it now does with the addition of the words "as amended by act approved March twenty-third, one thousand nine hundred and nine."

The second section here does not amend the section as it now exists, because the section as amended by the act of March twenty-third, one thousand nine hundred and nine, took the place of and was substituted for the section recited in the bill now before me, and at the time of the passage of this bill the section as it is in the act herewith returned did not exist. If this act were approved it would not amend nor change the act of March twenty-third, one thousand nine hundred and nine.

But, in addition to that, there are broader grounds which compel me, regretfully, to withhold my approval of this bill.

By paragraphs 19 and 20 of Article I of our State Constitution, it is provided as follows:

> "19. No county, city, borough, town, township or village shall hereafter give any money or property, or loan its money or credit, to or in aid of any individual, association or corporation, or become security for or be directly or indirectly the owner of any stock or bonds of any association or corporation.
>
> "20. No donation of land or appropriation of money shall be made by the State or any municipal corporation to or for the use of any society, association or corporation whatever."

This bill seems to me to be in conflict, not only with paragraph 19, but also with paragraph 20, if a county can be classed under paragraph 20 as a municipal corporation, which the opinions of the courts of the State seem to make questionable. However, paragraph 19 is sufficiently broad and comprehensive to clearly cover the bill now before me. This paragraph prohibits any county *eo nomine* "from giving any money * * * to or in aid of any individual, association or corporation."

A message was received from the Governor, by the hands of Mr. Fort, his Secretary, as follows:

State of New Jersey,
Executive Department, March 28, 1910.

To the General Assembly:

I herewith return to the House of Assembly, in which it originated, Assembly Bill No. 293, entitled "An act to incorporate the borough of Moonachie, in the county of Bergen," without my approval.

This bill takes part of the township of Lodi, in said county, and makes it a borough, to be called the borough of Moonachie. It contains no referendum, either to the people of the township of Lodi or to those who are located within the proposed new borough, and this of itself, under all rules established and acted upon by former Governors up to this time, would prevent its approval.

A new municipality should not be created out of an existing municipality without at least a provision in the act creating the new municipality, which requires the adoption of the act by the people in the district which it is proposed to set off as an independent municipality. It is usually required in these bills that both the municipality from which the territory is set off and the new borough shall be entitled to vote upon the proposition of whether it shall or shall not become a new borough; but as this bill contains neither of these provisions, it is clearly objectionable under all established precedents in this State.

The requirement that those who shall be set off into an independent municipality shall have opportunity to vote upon the question of creating a new municipality is founded in justice and good State policy and it should not be deviated from, unless there be some exceptional reason for such action. In this case there appears no such reason.

In evidence of the justice of this rule several letters of protest against this bill and requests for hearings in behalf of citizens have been presented to the Executive.

For the reasons herein given the bill is respectfully r
without my approval.

Respectfully,

J. FRANKLIN FORT,

Gov

Mr. Edge moved that the reading of the Governo
message be dispensed with, and that it be spread in full u
minutes,

Which motion was adopted.

A message was received from the Governor, by the h
Mr. Fort, his Secretary, as follows:

March 29th,

To the General Assembly:

I herewith return to the General Assembly, in which
inated, Assembly Bill No. 87, entitled "An act to amen
approved April fifteenth, one thousand nine hundred a
entitled 'A further supplement to an act entitled "An act
late elections" (Revision of 1898), approved April
one thousand eight hundred and ninety-eight,' approve
fourteenth, one thousand nine hundred and three," wit
approval.

This bill amends Chapter 106 of the Laws of 1909.
provides for the election of members of county and city
committees at primaries to be held in the several voting p
each year. The first primary elections were held under
in September of last year. The members of the county
committees at that primary were elected for one year
act has been held to be Constitutional by the Supreme
It is not the least ambiguous in its provisions as to the te
committeeman, and no person now holding the office of
committeeman had the slightest doubt, at the time he was
of the fact that when he was elected he was being ele
but one year.

The statute reads as follows: "The chairman of each
or city committee shall, on or before the first day of
each year, file with the clerks of the several municipali

umber of committeemen to be elected to such county or city ommittee in *each year,* as provided by the constitution or by-aws of such committee."

The act herewith returned, notwithstanding this known fact, roposes to extend the term of some committeemen in some ounties (not all of them) for another year, without the consent f the people.

Any statute which extends a term of office is objectionable egislation. To me it is vicious legislation. More than that, by he provisions of the act herewith returned, distinction as to ength of term is made so that in some counties and cities com-nitteemen are elected for one year and others for two. This is lso bad policy. There should be uniformity throughout the State. Either all should be elected for one year or all for two ears. It is of little concern to me which period it is, so long s it is one or the other and applies to all.

After a long and somewhat earnest contest, the principle of he selection of members of the county committee by the voters f each of the political parties was placed upon the statute. It vas salutary and advanced legislation and should only be hanged for reasons which are well considered and founded in vise public policy.

No such reasons appear on the face of the bill before me, nor ave any been suggested to me. It certainly cannot be success-ully contended that to lengthen the terms of county committee-nen by an act of the legislature is wise.

Under the old method it was just such proceedings, as is now roposed to be taken by law, that led up to the insistment on the art of the public for the enactment of Chapter 106 of the Laws f 1909, which required county committees to be elected and fixed definite term and time for their election.

If we are to extend their terms this year, why not the next, nd the next? Why not, in fact, abolish all right for the people o have any voice at all? It is this juggling with political ommittees which has caused to much dissatisfaction in party natters in the past. What difference is there between the legis-ature itself enacting a law to continue county committeemen in office and the old method, which was pursued in some c of having a county committee vote to continue itself in o another year? The one is as great an abuse of power violative of popular political rights as is the other. It such action as this that continually disgusts the men who s a party from principle, and dislike such chicanery, not trickery, in politics.

The act of 1909 has hardly had a chance to be tried u bill is passed to endeavor to undo all the good it was int accomplish. We should not play with the rights of the p this manner if we expect their approval. No party can and receive support, under such circumstances.

The old idea of "anything to win" is gone. The times that we shall be frank and fair with the voters.

Who demands this change? Have there been any peti the people asking for this legislation? Has there been representative gathering anywhere asking for it? Is before me anything other than the scheme of a few or would-be leaders, who fear the people and wish to other year of power without their consent? Are they to go to the people again? If so, why?

Someone has suggested that it causes expense. This lutely untrue. No one need spend a dollar, if he does n to. The tickets are printed and the polling places all p at public expense. Not only should a candidate for th not spend anything, but it should be made unlawful for hi so. If a man cannot be elected committeeman without ex money to get it, he should be defeated. The sooner we place where it is a crime to spend money in such electi better it will be for the State.

The conditions in the several counties of the State w tion to the election of county committeemen cannot be so as to require that in some of the counties committeem be elected for one year, while in others they should be ele two years. If the one-year counties are willing to chan system to the two-year system, then let the system be tw but if they are not, then let it be one year, as is provide statute which this act before me is intended to modify.

Chapter 106 of the Laws of 1909 was drafted a year ago, after much conference, and the time fixed in that statute, together with all its provisions, was agreed upon by the varied interests, finally passed and approved by the Governor.

No better legislation has been placed upon the statute books in years than this act. It will grow more popular as time goes on. The closer the party organizations can be brought to the people, and the more responsibility the representatives of the party in county committees can be made to feel in their relations with the people, the better it will be for the State, as well as the political organizations.

I can imagine no legislation that would be more objectionable than to enact the bill before me into law, in the face of the action of the Legislature of last year and the decision of the Supreme Court affirming that legislation.

For these reasons I am unable to assent to the provisions of this bill, and it is respectfully returned to the House of Assembly, in which it originated, without my approval.

Respectfully.

Petition, addressed to the Clerk from the Civic Association of Bayonne, protesting against the passage of Assembly Bill No. 153.

Petition, addressed to the Clerk, from the Hudson County Socialist Party, praying for the passage of the child labor bill, known as Assembly Bill No. 21.

March 21st, 1910.

The Clerk presented a petition addressed to the Legislature from the East Jersey Water Company and the Jersey City Water Supply Company, setting forth that by a recent decision of the Court of Chancery in the case of Paterson *v.* East Jersey Water Company (70 Atlantic, 472), it was held that compensation must be paid to owners of lands adjoining a stream, water from which is taken for the supply of cities and towns and their inhabitants, however trifling may be the injury; and that the court will, under such conditions, enjoin the taking of such water unless compensation is made, etc., etc. The court, therefore, has recommended that the various companies and municipalities interested shall secure the legislation necessary for the condemnation of these rights and for the power to join in one suit all riparian owners interested. House Bill No. 344, introduced on March 1st, 1910, now before you, will, in our opinion, accomplish the purpose, and we would respectfully petition that such bill be passed, either in its present form or with such alterations as may seem best to your honorable body.

Austin, Tuckerton, be and they are hereby appointed a committee to investigate the fish and game laws of the State of New Jersey and report to the next Legislature, recommending such legislation as, in its judgment, would best serve to protect the fish and game of this State from extermination or depletion, permitting the maximum amount of shooting with the minimum amount of protection; that this committee shall have the power to issue subpœnas and

Your committee begs leave to report that they
ization on June sixteenth, and in order to study
thoroughly, sub-committees were appointed as foll
tory game birds; native game birds and fresh
fishing, with instructions to report in the early w
of their findings to the full committee. The su
native game birds put themselves in touch with e
the State through the local granges and receiv
replies to their inquiries as to the present cond
ideas of what changes were needed.

The committee on migratory game waited unti
when the wild fowl were coming back from the
in company with members of the full committee
several representatives of the counties on the coast
we passed, started from Toms River and passed th
cipal hunting waters or feeding grounds of the
at Cape May on the third day. Not only did th
thousands of wild fowl themselves, but at the n
night, one at Tuckerton (in the very center o
shooting), in Ocean county, the other at Sea Isl
May county, it was the unanimous testimony of t
the number of wild fowl was increasing rapidly a
the past two years. We are of the same opinion
that restrictive laws shortening the season are no
time, so far as ducks, brant or geese are concerned
of bay birds, quail, etc., we find the number st
and have recommended such legislation as seem
at this time.

The committee on fish were amazed to find
absolutely no protection to our native salt water g
bass and perch. Not only are they allowed to n
the winter when schooled up for protection a
heavy with roe, but the spawning grounds in
hauled over with nets during the months of Apr
millions of the eggs and small fry destroyed.
cow bass are caught and sold. In the last few
nificent fish has been almost exterminated, and w
our power that a law be passed immediately to
netting in the rivers after January 1st until Ju
that these bass may have a chance to multiply a
almost extinct.

The committee would also recommend that a

$100 each be imposed upon the fish pounds along the coast, as they are taking large quantities of our food fish and should contribute to the State's income.

These recommendations have been passed on by our general committee after a full discussion of the evidence gathered, and bills prepared covering the different classes of fish and game in accordance with our instructions as embodied in the resolution creating our commission. The bills are now before the Legislature awaiting your favorable action.

A message was received from the Governor, by Mr. Fort, his Secretary, as follows:

State of New Jersey,
Executive Departme
April

To the General Assembly:

I herewith return to the House of Assembly, in inated, Assembly Bill No. 172, entitled "An act to entitled 'An act providing for divorce and for dec of marriage, and for alimony and the maintenanc (Revision of 1907), approved March seventeenth, nine hundred and seven," without my approval.

This bill is intended to be an amendment to Sec General Divorce Act of this State (Revision of 190 bill to this, in many respects, was vetoed at the p because it was deemed by the Chancellor to be in there appears to be, for the reasons given in that no necessity for the passage of this act.

After conference with the Chancellor in relati herewith returned, he advises me that the Court already has the full power to do what the bill here desires to accomplish.

The Revision of 1907 of the divorce act is ger adopted in an effort to obtain a uniform system of throughout the several States. It is quite essential, if this is to be an effective law, that it should be retained as nearly as possible in its original form as it was adopted by the conference held in the city of Washington, in 1906, under the call of the then Governor of Pennsylvania. If it is to be amended and changed from time to time, it will soon cease to be uniform with like laws of other States. This would be very regrettable, because at this time the one effort in the country seems to be to secure the passage of uniform laws on a number of subjects, and public sentiment is quite awake to the uniform law question.

There appears to be no reason for allowing a person seeking a divorce to change her name and use her maiden name or, as the proposed act before me states: "the name of a former deceased husband," until after final decree in the Court of Chancery has been had, and it is settled that she is to be in fact divorced.

It would not seem proper for the court to make a decree to allow a woman to change her name pending divorce proceedings and before the final decree: if for any reason the final decree should never be made and her divorce should be refused she would then again be compelled to return to the name of her then husband. It would seem as if people seeking divorce could await the orderly procedure of the Court of Chancery without trying to anticipate its decrees.

In any event, in view of the opinion held by the Chancellor in regard to this case, with whom I conferred with relation to this bill, I am unwilling to give the bill my approval.

I concur in the view of the Chancellor, and for the reasons stated I return this bill to the General Assembly without my approval.

Respectfully,
JOHN FRANKLIN FORT,
Governor.

Resolved, That the index of the minutes of the Assembly for the present session be prepared by James Parker, Clerk of the House of Assembly, in the same manner as the index of the minutes of last year, and that he be paid therefor the sum of two hundred and fifty dollars,

Which motion was adopted.

The same gentleman offered the following resolution, and moved its adoption:

Resolved, That the minutes of the Assembly for Monday, April 4th; Tuesday, April 5th; Wednesday, April 6th, be adopted, subject to the approval of the Committee on Judiciary, and that said minutes shall be printed when so approved,

Which motion was adopted.

The same gentleman offered the following resolution, and moved its adoption:

Resolved, That a committee of three be appointed to wait upon the Governor and inform him that the House is ready to adjourn *sine die,* and ascertain if he has any further communication to transmit to the House,

Which motion was adopted.

In accordance with the above resolution, the Speaker appointed Messrs. Edge, Sullivan and Smalley.

The Committee appointed to wait upon the Governor returned and presented the following communication from his Excellency:

The Governor requests your committee to extend his greetings to the members of the House of Assembly as a body and as individuals, and to say that he has no further matter to bring to your attention at the present session, and asks us to convey to each member of the House his regards and best wishes for the success of each.

Mr. Edge moved that the communication from the Governor be received and spread in full upon the Journal of the House,

Which motion was adopted.

On motion of Mr. Edge,

The House took a recess.

The House reconvened.

A message was received from the Senate, by the hands of its Secretary, as follows:

STATE OF NEW JERSEY,
SENATE CHAMBER,
April 6th, 1910.

Mr. Speaker:

I am directed by the Senate to inform the House of Assembly that the Senate has passed the following resolution:

"*Resolved,* That the hour of adjournment having arrived, the Secretary inform the House of Assembly that the Senate is now ready to adjourn *sine die,* and awaits the presence of the House of Assembly."

H. L. TYLER,
Secretary of the Senate.

The Speaker thereupon announced that the hour fixed upon for the final adjournment of both Houses of the one hundred and thirty-fourth (134) Legislature had arrived, and he declared the House of Assembly adjourned without day.

The members of the House of Assembly, preceded by the Speaker and Clerk, then proceeded to the Senate Chamber, and after the announcement by the Speaker that, in accordance with his duties, he had adjourned the House of Assembly without day, the President of the Senate declared the one hundred and thirty-fourth Legislature adjourned *sine die.*

Assembly Concurrent Resolutions.

Concurrent Resolution—By Mr. Schwartz—WHEREAS, Since February 15th, 1898, the wreck of the battleship Maine, with the score or more of sailors who went down to an ocean grave, has remained at the bottom of Havana Harbor, a menace to shipping; and WHEREAS, A bill introduced by the Hon. Wm. Sulzer, of New York, in Congress, for the removal of the wreck and the proper interment of the bodies of the seamen therein contained is being advocated for passage; be it therefore *Resolved* (the Senate concurring), That the people of the State of New Jersey, in Legislature assembled, urgently request the New Jersey Senators and Representatives in Congress to do their utmost to obtain immediate action on the bill introduced by Representative Sulzer, or some similar bill—61, 166.

By Mr. Matthews—WHEREAS, It is proposed in the Congress of the United States to pass an act for the Federal incorporation of corporations to engage in trade and commerce among the States and with foreign nations; and WHEREAS, The passage of such a law would (1) Furnish industrial combinations with a refuge to continue industrial abuses under Federal protection; (2) There is a very grave doubt as to the constitutionality of such Federal incorporation; (3) It would result in too great Federal centralization by the enlargement of the Federal power at the expense of the power of the States; (4) The State is annually in receipt of more than two million dollars in charter fees and taxes on miscellaneous corporations, nearly all engaged in commerce among the States, a large portion of which would be diverted from the State to the Federal Government; therefore, *Be it Resolved by the House of Assembly* (the Senate concurring), That the Senators and Representatives in Congress from the State of New Jersey be and are hereby respectfully requested to vote against the passage of any bill providing for the Federal incorporation of corporations; and *Be it Resolved*, That a copy of this resolution, signed by the President and Secretary of the Senate and the Speaker and Clerk of the House of Assembly be sent to each of the Senators and Representatives from the State of New Jersey—62.

By Mr. Layden—*Resolved* (the Senate concurring), That the Clerk of the House of Assembly be authorized and instructed to draw up a set of suitable resolutions commending Secretary of State Knox for his efforts to promote international peace—63.

Concurrent Resolution—By Mr. Edge—WHEREAS, The greatly increased cost of meat and other food has become a matter of much seriousness to the citizens of this State, and the cause would seem to justify an earnest and searching investigation; therefore be it *Resolved*, That the House of Assembly (the Senate concurring) do heartily approve of the action of the Administration at Washington investigating any combination of food interests and that we do heartily endorse any further action on the part of the Federal government looking to a correction of the present condition—81, 135.

By Mr. McAllister—WHEREAS, One of the largest and most important industries of this State is the growing and shipping of oysters; and WHEREAS, By reason of the natural facilities, the oysters of said State may be laid out, which natural process develops, fattens and perfects the oyster in such a manner that the oysters of the State are equaled by none in the world; and WHEREAS, The United States Pure Food Commission has issued an order prohibiting such laying out of oysters in the waters of the said State of New Jersey, which said order will become operative on the first day of May of the present year, and will, if enforced, be the means of putting the New Jersey oyster in the class with less desriable oysters of other States, not having such aforesaid natural facilities, and will be the means of practically ruining the said great New Jersey oyster industry, which is, as yet, only partially developed; therefore be it *Resolved*, By the House of Assembly (the Senate concurring), That the members of this Legislature take the matter up with the United States Senators of this State and their several respective members of Congress, and urge upon said national representatives the importance of the oyster industry of their State and the disastrous effect which said order of the Pure Food Commission will have upon said oyster industry, if enforced, to the end that said national representatives may become thoroughly conversant with the conditions concerning the oyster industry and will use their voice and influence in having the aforesaid order rescinded; and be it *Resolved*, That a copy of this resolution, signed by the President and Secretary of the Senate and the Speaker and Clerk of the House of Assembly, be sent to each of the Senators and Representatives from the State of New Jersey—130, 167.

By Mr. Bedle—WHEREAS, The Pure Food Department of Agriculture of the United States have caused certain laws to be passed, which, if enforced, will cause the Oyster Industry of the State of New Jersey great loss in money and practically put out of business the oyster packers and planters; be it *Resolved* (the Senate concurring), That the Governor appoint a commission of four practical oystermen, one from each of the following counties: Atlantic, Cumberland, Ocean and Monmouth, also the chief of the Bureau of Shell Fisheries, with power to confer with the Secretary of Agriculture at a hearing which is to be held on Wednesday, the second day of March, 1910, at the city of Washington —257, 287.

Concurrent Resolution—By Mr. Vredenburgh—WHEREAS, The construction of the inland waterway along the New Jersey coast has already shown in a marked degree the advisability of such an improvement; and WHEREAS, There is a general demand that the same be continued by means of a canal from Bay Head, in Ocean county, to the Shrewsbury river, in Monmouth county; therefore be it *Resolved,* By the House of Assembly (the Senate Concurring), That the Department of Geological Survey, assisted by three competent residents of the State, to be named by the Governor, be authorized to make a survey of the route, ascertain the probable cost of the construction of such a waterway and report at the next session of of the Legislature—272, 1125.

By Mr. Edge—*Resolved* (the Senate concurring), That the Governor be requested to return to the House of Assembly, in which it originated, Assembly Bill No. 26, entitled "An act to authorize the erection of a tablet or monument on the battleground of Chestnut Neck, in the State of New Jersey, and to appropriate money to pay the cost of the erection and dedication of the same," for further consideration; that the same may be amended to cure defects found in the construction thereof—512, 556.

By Mr. Crosby—WHEREAS, The National Association of Shell Fish Commissioners, representing twenty States of the United States engaged in the cultivation of shell fish, will hold its annual convention in the city of Mobile, Alabama, April 19th, 20th and 21st, 1910; and WHEREAS, It is fitting that the State of New Jersey, which stands third in the value of the products of shell fish, shall be fittingly represented at this convention; therefore be it *Resolved* (the Senate concurring), That the Governor be and is hereby authorized and empowered to appoint the Chief of the Bureau of Shell Fisheries and four persons actively engaged in or associated with the shell fish industry to represent the State of New Jersey at the said convention of the National Association of Shell Fish Commissioners—514, 643.

By Mr. Edge—*Resolved* (the Senate concurring), That the one hundred and thirty-fourth session of the Legislature of the State of New Jersey adjourn sine die on the thirty-first day of March, one thousand nine hundred and ten, at three o'clock in the afternoon of said day—623, 1049.

By Mr. Crosby—*Resolved* (the Senate concurring), That the Governor be requested to return to the House of Assembly, in which it originated, Assembly Bill No. 95, entitled "An act to repeal a portion of an act entitled 'An act to amend an act entitled "An act for the better regulation and control of the taking, planting and cultivating of oysters and clams on lands lying under the tidal waters of the county of Ocean, in the State of New Jersey," approved March twenty-sixth, one thousand nine hundred and two,' approved April fourteenth, one thousand nine hundred and three," for further consideration—627, 668.

Concurrent Resolution—By Mr. Thompson—*Resolved* (the Senate concurring), That the Governor be requested to return to the House of Assembly, in which it originated, Assembly Bill No. 282, entitled "Supplement to an act entitled 'An act providing for the formation, establishment and government of towns,' approved March seventh, one thousand eight hundred and ninety-five," for further consideration—732, 771.

By Mr. Vredenburgh—WHEREAS, A bill is now pending in the House of Representatives authorizing the President of the United States, by and with the advice and consent of the Senate, to promote Major-General Daniel Edgar Sickles, of the United States army, to the grade of lieutenant-general and providing for his retirement from active service with that rank in the army; and WHEREAS, The said bill, having been referred by the House of Representatives to its Committee on Military Affairs, and that committee, after giving said bill due consideration, has reported the same to the House with the recommendation that it do pass; therefore be it *Resolved*, By the House of Assembly of the State of New Jersey (the Senate concurring), That in view of the distinguished services of Major-General Sickles as a regimental, brigade, division, army corps and department commander, we hereby request the Senators and Representatives in Congress from this State to vote for the aforesaid bill, and to favor its enactment into law during the present session of Congress. *Resolved*, That a certified copy of the foregoing preamble and resolution be transmitted by the Clerk of the House to each Senator and Representative in Congress from this State—732, 1072.

By Mr. Edge—That the thanks of the House of Assembly be tendered MacCrellish & Quigley for the prompt and satisfactory manner in which the current printing for this session has been performed, and for their accuracy and the intelligent manner in which their work has been done—1211.

By Mr. Edge—That the thanks of the House be and are hereby tendered to the publishers of the *Daily State Gazette* and the *Daily True American*, both of Trenton, for the papers served to the individual members during this session—1211.

By Mr. Edge—That the index of the minutes of the Assembly for the present session be prepared by James Parker, Clerk of the House of Assembly, in the same manner as the index of the minutes of last year, and that he be paid therefor the sum of two hundred and fifty dollars—1211.

By Mr. Edge—That the minutes of the Assembly for Monday, April 4th; Tuesday, April 5th; Wednesday, April 6th, be adopted, subject to the approval of the Committee on Judiciary, and that said minutes shall be printed when so approved—1212.

By Mr. Edge—That a committee of three be appointed to wait upon the Governor and inform him that the House is ready to adjourn *sine dic*, and ascertain if he has any further communication to transmit to the House—1212.

The Speaker thereupon announced that the hour fixed upon for the final adjournment of both Houses of the one hundred and thirty-fourth (134) Legislature had arrived, and he declared the House of Assembly adjourned without day. The members of the House of Assembly, preceded by the Speaker and Clerk, then proceeded to the Senate Chamber, and after the announcement by the Speaker that, in accordance with his duties, he had adjourned the House of Assembly without day, the President of the Senate declared the one hundred and thirty-fourth Legislature adjourned *sine die*—1213.

Communications, Petitions, Memorials, etc.

Election of Speaker—Upon taking the chair, Hon. Harry P. Ward, the newly elected Speaker, made an address, which will be found on page 4.

Communication—From the Senate—*Resolved,* That the Secretary of the Senate be directed to inform the House of Assembly that the Senate has organized by the election of Hon. Joseph S. Frelinghuysen, of the county of Somerset, President, and Howard L. Tyler, of the county of Cumberland, as Secretary, and has proceeded to business—6.

From Honorable John Franklin Fort—Governor's Message—10.

From Mr. McAllister—*To the Speaker and Members of the General Assembly:* It is with regret that I call the attention of the House of Assembly to the decease of the Hon. Robert More, which occurred on January 2d, 1910. Mr. More was a Republican and prominent at the birth of the party in Cumberland county. He was the first Republican member to serve his State from that county, serving as a member of the House during the years 1856, 1857, and again during the years 1866, '67 and '68. In 1867 Mr. More introduced the resolution providing for the portrait of Lincoln by the side of Washington, and it now hangs on the wall before this House. As chairman of the committee to secure the portrait, he made the speech at the time the portrait was placed where it now is. Mr. More has been termed "The Grand Old Man of Cumberland County." Always interested in the affairs of State, honest, sincere, true to his friends and his party, his ninety years of life made the world better for his living—51.

To the Speaker—*Hon. Harry P. Ward, Speaker of the House of Assembly:* DEAR SIR—I beg to advise you that the contract for the current printing of the Legislature for the session of 1910 has been awarded to MacCrellish & Quigley, of Trenton. Very respectfully, Henry J. West, Comptroller—60.

By Mr Edge—*To the Honorable Members of the House of Assembly:* The A-Bide-a-Wee Home for Incurables hereby petitions for an appropriation from the State of New Jersey in the sum of twenty-five thousand dollars, and in support of this petition the said corporation respectfully shows as follows: The contents of this communication will be found on pages 76 and 77, and is signed by Clarie P. Plummer, President A-Bide-a-Wee Home for Incurables —76.

From His Excellency Governor J. Franklin Fort—State of New Jersey, Executive Department, January 25th, 1910. *To the Legislature:* Pursuant to statute, I herewith transmit the report of the Commission appointed under Chapter 110 of the Laws of 1908, entitled "An act to authorize the erection of a monument on the battlefield of Salem Church, in the State of Virginia, and a tablet on the battlefield of Spottsylvania, in the State of Virginia, to commemorate the services of the Fifteenth Regiment, New Jersey Volunteer Infantry, in the battles of Salem Church and Spottsylvania, and other engagements of the Civil War, and to appropriate money to pay the cost of the erection and dedication of the same." The report shows that the Commission has completed its labors, and in transmitting the report permit me to say that personal inspection of the work and personal presence at the dedication enables me to commend to the Legislature the thorough and efficient way in which the Commission performed its work. Respectfully, John Franklin Fort, Governor—95.

Communication—From His Excellency Governor J. Franklin Fort—State of New Jersey, Executive Department, January 25th, 1910. *To the Legislature:* I herewith transmit the report of the Industrial Commission appointed under Joint Resolution No. 11 of the Laws of 1908, and continued under Joint Resolution No. 7 of the Laws of 1909, and commend to the careful consideration of the Legislature the admirable recommendations on industrial education contained in the report herewith submitted. Respectfully, John Franklin Fort, Governor—98.

By Mr. Bedle—Jersey City, N. J., January 24th, 1910. *Hon. Harry Ward, Trenton, N. J.:* DEAR SIR—At a meeting of the Madison Club, held the twenty-first day of this month, by unanimous vote they went on record as being in favor of the passage of Assembly Bill No. 19. The organization feels that any measure beneficial to the health of young men will meet with the popular approval of fair-minded people. Our organization feels that the passage of Assembly Bill No. 19 will eradicate many evils and temptations which are open to young men on the Sabbath. Yours truly, Madison Club, Inc., E. H. Davidson, Secretary—101.

The Speaker presented a petition from the legal voters of Hudson county protesting against any legislation looking to the nullifying or repealing of laws that now protect the sanctity and quiet of the first day of the week, commonly called Sunday—101.

From His Excellency Governor J. Franklin Fort—*To the Senate and General Assembly:* Herewith I transmit a report made to the Governor by the Department of Accounts. It is the first time within the history of the State that such a statement as this has ever been prepared or presented to the Executive, and I deem it of such importance, as a matter of general information, to make it my duty to transmit it to the Legislature with the recommendation that it be ordered printed—105.

Mr. Edge presented a petition from the Mothers' Congress, members of the Women's Research Club and other citizens of Atlantic City and county, requesting the honorable body of Assemblymen to do all in their power to enact a law and make other necessary provision for the establishment of a State Reformatory for Women—116.

Communication—A petition was received from Mr. E. Clark Cline, Stated Clerk of the Newton, N. J., Presbytery, protesting against any modification of the Sabbath law—135.

From His Excellency Governor J. Franklin Fort—On the twenty-sixth day of July, nineteen hundred and nine, the Secretary of State of the United States officially transmitted to me as Governor of the State the proposed Sixteenth Amendment to the Constitution of the United States passed by The Congress and directed to be submitted to the Legislatures of the several States, as provided by the Constitution of the United States. *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following article is proposed as an amendment to the Constitution of the United States, which, when ratified by the Legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution: "Article XVI. The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration." It is submitted to the Legislature for its action in the firm conviction that its approval is in the interests of a just and equitable method of taxation. etc., etc.—139.

From His Excellency Governor J. Franklin Fort—*To the Legislature:* At a very large and enthusiastic meeting held at Taylor Opera House, in the City of Trenton, on the twelfth day of October last, a series of resolutions were passed, requesting the Governor to name a Commission of citizens from the State to consider the feasibility of establishing either a park or some monument to properly commemorate the point on the Delaware River above Trenton known as Washington's Crossing. Following these resolutions came much individual approval from citizens in all parts of the State. Acting upon these requests, I named thirty-nine gentlemen to take the matter into consideration and further the patriotic project if, in their judgment, it could be carried to success. The persons named were: (Found on Page 144)—144.

From His Excellency Governor J. Franklin Fort—*To the Legislature:* Herewith I transmit the report of the New Jersey State Tuberculosis Commission to which reference was made in my Second Annual Message. The State of New Jersey should foster in every way possible proper institutions for the treatment of persons afflicted or threatened with tuberculosis, and the recommendations contained in the report of the Commission herewith submitted are commended to the favorable consideration of the Legislature—169.

From His Excellency Governor J. Franklin Fort—*To the Legislature:* I herewith transmit two communications, one received from the Department of State of the United States, and the other from Honorable George B. McClellan, when Mayor of the City of New York, in relation to the water conditions on Staten Island and in the borough of Richmond. As proposed acts are now pending before you touching the question of the transportation of waters from this State to Staten Island, and as these letters bear upon the subject, I deem it to be my duty to transmit them that you may be in possession of he facts contained therein—172.

Communication—From His Excellency Governor J. Franklin Fort—*To the Legislature:* I herewith transmit the report of the New Jersey Inter-State Bridge Commission. This Commission was appointed by Joint Resolution No. 3, approved April 2d, 1908. By the provisions of the second section of that resolution, five thousand dollars was appropriated to defray the expenses of the Commission, but the Supplemental Appropriation Bill for that year only gave them one thousand dollars of that amount. The Commission, while it incurred considerable expense, failed to make application for the one thousand dollars appropriated in the Supplemental Appropriation Bill, and that sum lapsed into the treasury of the State. I recommend that the Commission be made permanent, or the Governor authorized to appoint a permanent Commission, as the Legislature may prefer and that a reasonable appropriation be made toward the expenses incident to the work of the Commission. Etc., etc.—176.

Mr. Smalley presented a petition from the Presbytery of Elizabeth asking for the enactment of a local option law—245.

From His Excellency Governor J. Franklin Fort—*To the Legislature:* Herewith is transmitted the report of the State Highway Commission, created by Chapter 33 of the Laws of 1909, approved March 30th, 1909. The report gives an account of the work of the Commission during the past year and its recommendations as to the highways of the State and the establishment of the proposed Ocean Boulevard. This whole subject is commended to the Legislature with the earnest hope that the plan suggested by the Highway Commission may receive its approval and that this system of roads as projected may soon become an accomplished fact—266.

Mr. Vredenburgh presented a petition from the Phil Kearny Post, No. 1, G. A. R., of Newark, asking for the passage of Assembly Bill No. 72. The petition was signed by Joseph G. Surgis, Commander, and William H. Howard, Acting Adjutant—272.

Mr. Meyer presented a petition from the Sussex County Pomona Grange asking him to use his influence to have an appropriation made to take care of the Feeble-Minded Children from Sussex county who may be in State Home for Feeble-Minded Children at Vineland, N. J.—272.

Mr. Smalley, Chairman of the Special Committee on the Bond of the State Treasurer, offered the following report: Your committee, to which was referred the bond of State Treasurer Daniel S. Voorhees, respectfully approve the same, and recommend the concurrence of the House in the resolution approved by the Senate. **Wm. W. Smalley, Edward T. Moore, James Baker**—281.

From the Senate—Informing the House of Assembly that the Senate had approved the Bond and Oath of Hon. Daniel S. Voorhees, State Treasurer, etc.—286.

Communication—Mr. Mather presented a petition from the congregation and Sunday school of the First Presbyterian Church of Hamilton Square, N. J., protesting against any legislation that will legalize the playing of games and the sale of liquor on any ,part of the Lord's Day called Sunday—290.

By Mr. Tatem, for Committee on Municipal Corporations—The Committee on Municipal Corporations respectfully report that they have carefully considered the subject-matter referred to in the following resolution, introduced in the House of Assembly by the Honorable Walter E. Edge, of Atlantic county, which was, on motion referred to your said Committee. The resolution is as follows: "Inasmuch as considerable comment is heard regarding excessive telephone charges in certain portions of our State, be it *Resolved,* That proper consideration be given the subject and any suitable recommendations found advisable be made to this body." Your committee gave several public hearings, and all parties in interest were heard, and as a result of said public hearings, and the facts as shown thereby, your Committee respectfully report to this House and recommend the passage of the following resolution. Henry, R. Tatem, Chairman, Monroe V. Poole, J. William Huegel, John J. Matthews. *Be it resolved by the General Assembly of the State of New Jersey:* That the Committee on Municipal Corporations of this House, which Committee consists of the following persons: Henry R. Tatem, Chairman; Monroe V. Poole, J. William Huegel, John J. Matthews and Oscar B. Smith, be and the same is hereby empowered and directed to enter upon and conduct an investigation of telephone and telegraph rates, tolls and charges, charged or imposed by any company or corporation doing business in the State of New Jersey, and to investigate the general conditions under which the said companies transact their business in the State of New Jersey, and that the said Committee investigate and report the various rates, charges and tolls exacted for elephone and telegraph service in the State of New Jersey, etc., etc., etc.—336.

From His Excellency Governor J. Franklin Fort—*To the Legislature:* Herewith I transmit the "Progress Report" submitted by the Board of Appraisers of the Railroads and Canals of the State, appointed under Joint Resolution No. 3, entitled "Joint Resolution concerning an inventory and appraisal of railroad and canal property, including franchises, in the State of New Jersey," approved April 5th, 1909. By the terms of this resolution the Governor was authorized to appoint three competent persons, two of whom should be experts, who should "proceed forthwith to make a revaluation of all railroad and canal property in the State, real and personal, including separately the franchises, and make a true and complete inventory and appraisal of the true value thereof," etc.—444.

By Mr. Schwartz—*To the Senate and General Assembly of the State of New Jersey:* At a public meeting held at Cranford, February 23d, 1910, under the auspices of the Men's Club, to listen to an address and discuss the subject of utilities legislation, the following resolution was unanimously adopted by rising vote at the close of the meeting: "WHEREAS, It is clear, from the legal precedents in the courts, that the public, because of special privileges given the utilities corporations, is entitled, as right, in return. to fair service and reasonable rates: and WHEREAS, Private action in the courts to secure these rights is practically prohibited by reason of the delay and expense involved: and WHEREAS, Both political parties have pledged themselves to establish a Public Service Commission, where these differences between the public and the corporations can be adjusted speedily, accurately, and without expense; therefore be it *Resolved,* That we respectfully petition both parties, in Legislature assembled, to fulfill the pledges made, and establish such a commission, with the ample powers promised; and we request our Senator and Assemblymen to give their best efforts in that behalf." Edwin W. Carruth, Sec'y.—509.
